BALLOON RACE ENDS IN THE CAROLINAS

ANNUAL GORDON BENNETT CUP RACE STARTED SATURDAY

Detroit Bags Drift Toward Florida Coast—Four Come Down In the Land of the Skies—German Entrant Lands On Sugar Island, Lake Erie—Italian Balloon Is Still Up and Sailing At Last Reports

Continuation of a slight general trend of the wind toward the southeast Sunday led officials in charge of the annual Gordon-Bennett balloon race at Detroit, Michigan, to believe a majority of the boys were wending their way toward the Florida coast.

Fifteen balloons started. Officials expressed the opinion that it would be a week before the result of the race could be decided.

Absence of reports from others during Sunday led to the belief that several were still in the Great Lakes out of sight of land.

While over Amherstburgh, the Lafayette dropped a note stating that air current indications then were toward the southeast and showed no signs of varying.

A number of balloons in the Gordon-Bennett cup race are believed to be hovering over eastern and central North Carolina with two or more over South Carolina or northern Georgia.

The balloon Belgica, Ernest De-Buyter, reserve officer of the Belgian army, pilot passed over Charlotte, North Carolina, at 4:30 p. m.

Asheville reported two balloons, one traveling in a southwesterly direction at a great height.

A telephone message at Asheville from Spruce Pine, North Carolina, in the heart of the Great Smoky Mountains, reported that two balloons had been seen, but could not be identified. One was traveling toward Marion, North Carolina, it said.

Two hours later two bags passed over Marion, traveling south.

The U. S. army entry, piloted by Captain W. E. Kepner, dropped low over Lenior, and landed his radio set with a parachute.

A balloon, thought not to be one of those reported in the western part of the state, passed over Durham, North Carolina, Sunday night about six o'clock traveling southward. Durham is 150 miles from any of the other points and somewhat to the north.

The Belgian balloon, Wallonie, in the Gordon-Bennett race, descended six miles south of Greenville, South Carolina, at 7:30 o'clock Sunday night without injury to either Pilot H. Quersin or M. Theis, his aide.

The U. S. army balloon entry in the Gordon-Bennett cup race, landed at York, South Carolina, Sunday night.

The army balloon, last to leave the Detroit field, landed without injury to the bag or pilots. Captain W. E. Kepner, the pilot, and Lieutenant W. O. Earickson, aide, immediately began packing the big bag for shipment to Davis Island, New York.

Kepner said that during their trip over western North Carolina mountains the bag was sucked up to a height of 27,000 feet, causing it to lose gas and forcing them to discard all ballast and some equipment.

FAUSNAUGH PUBLIC SALE.

The first public sale of the season was held last Friday near East Ringgold by Roy Fausnaugh. The sale was well attended; horses sold as high as \$187; cows \$80. C. G. Chalfin was the auctioneer. Wayne Hoover, clerk.

The one thing a wife will cheerfully admit to her husband is that she can't think of any reason for having married him.

The Paris-Bruxelles balloon, piloted by Maurice Bienaime, with A. Veenstra as aide, landed safely two miles from Dunn, North Carolina at 5:50 p. m. Bienaime said the bag passed thru a number of storms and at one time ascended to 15,000 feet.

With its gas valves jammed and refusing to function, the German balloon Brandenburg, which left Detroit Friday in the Gordon-Bennett cup race landed Sunday night on Sugar Island, 21 miles out in Lake Erie.

The bag was piloted by Dr. Reinhold Halben and Hugu Kaulen, Jr.

There is no telegraph communication between the island and the main land, so the aeronauts could not report their position. Summer residents went to their assistance as both men were nearly exhausted from a battle with the balky balloon and adverse wind currents.

The balloonists remained overnight at the cottage of G. L. Jeager of the Jaeger Machine Co., Columbus.

The balloon Helvita, Swiss entry in the Gordon-Bennett cup race, landed 16 miles north of Statesville, North Carolina, at 6:15 p. m.

NELSON T. JOHNSON

Nelson T. Johnson, who has been appointed assistant secretary of state. He has been serving as chief of the far eastern division of the department.

BARN STRUCK BY LIGHTNING AND CONSUMED

During the heavy rainstorm last Saturday night the barn of Sherman Hurley near Fox, was struck by lightning. The building, 50 by 60 feet, four sets of harness and between seven and eight tons of hay were consumed. It was a new building, well constructed and was roofed with galvanized iron. Fortunately for Mr. Hurley the wind was in an opposite direction and that was the only thing that saved his home.

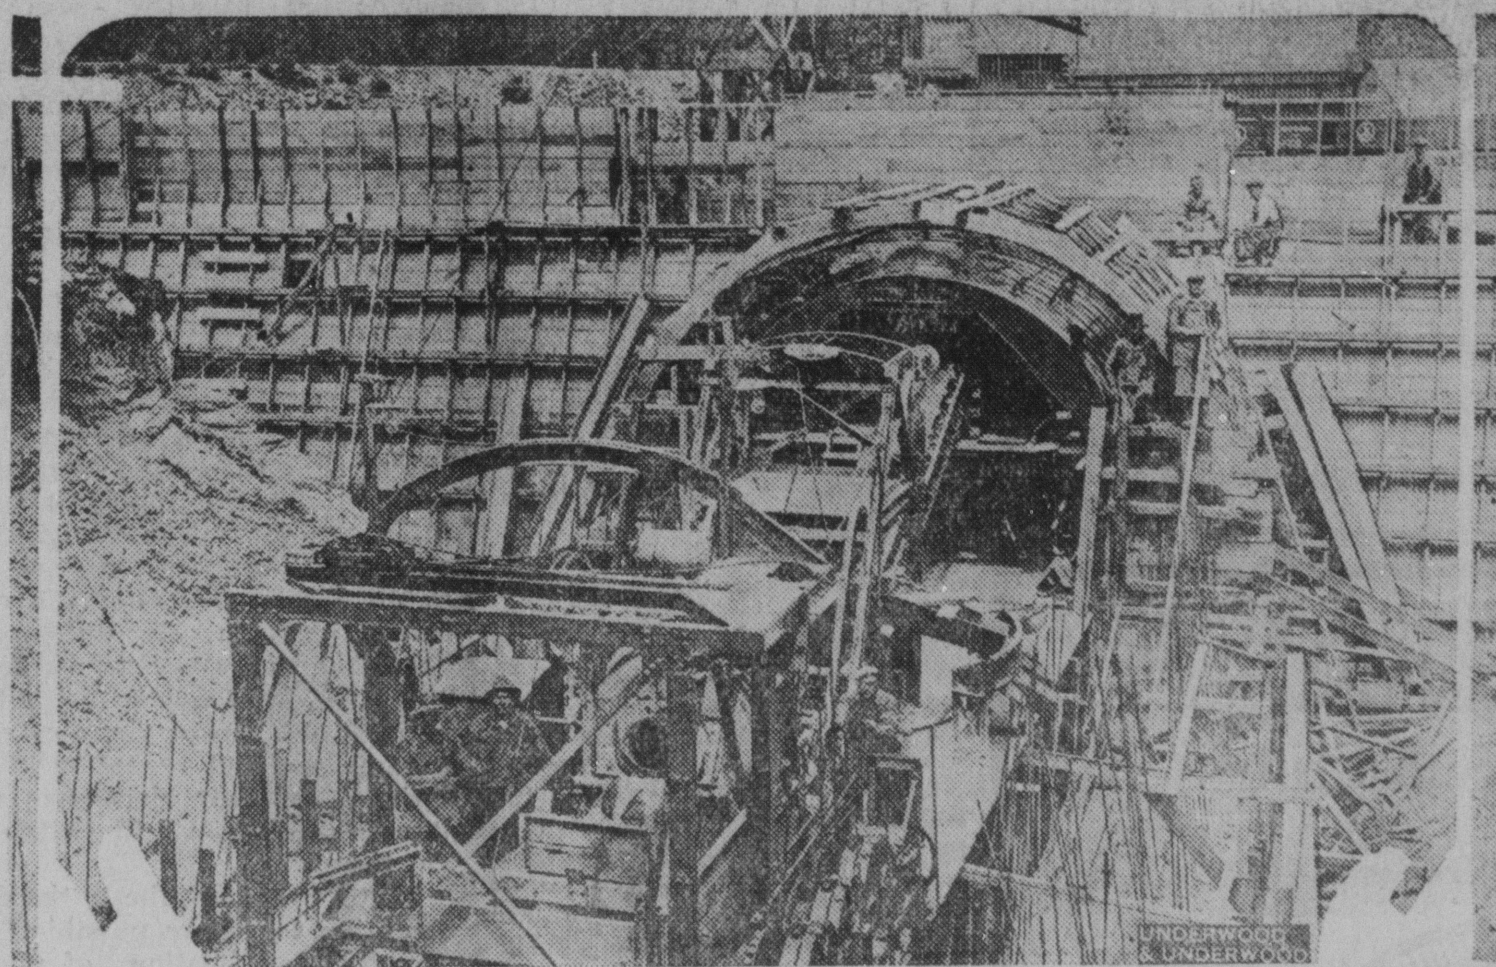

The barn and contents was partially covered by insurance.

BIRTHS

To Mr. and Mrs. Wilbur Cunningham, Jackson township, Sunday, September 11, 1927, a daughter.

To Mr. and Mrs. Elmer Palm, 810 South Scioto street, Sunday, September 11, 1927, a daughter, Betty Jane.

Building Longest Tunnel in America

The great bore of the Great Northern railroad through the Cascade mountains, between Berne and Scenic, Wash., a distance of eight miles, is being built. It will cost \$10,000,000, and shortens the distance by eight miles.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Columbus—Common pleas judges thruout Ohio were asked today by Chief Justice Carrington T. Marshall, of the state supreme court, to expedite the trial of all criminal cases arising from indictments returned by the September grand juries, as a means of discouraging crime in the various counties.

Cleveland—Lawrence Lupo, Cleveland prize fight promoter shot Friday night as he sat in his auto in front of his home was recovering Monday, physicians said. Lupo's left eye was shot out and his nose nearly blown off.

Dayton—O. L. Cunningham, county farm agent reports that the average yield in crops in Montgomery county this year will be from 15 to 50 per cent less than those of 1926. Corn is about 65 per cent less and two weeks or more late. Oats dropped from 20 to 45 per cent in some localities.

Cleveland—At liberty since August 12, from London prison farm, where he escaped, Gilbert Dawson, 28 of Akron, Ohio, was caught here Monday by Cleveland police. Police said Dawson had attempted to visit his wife who was staying in Cleveland.

Columbus—Silvie Testaguzze, 5, died yesterday of infantile paralysis with which he was stricken three days ago. The tot had been isolated in a hospital since discovery of symptoms of the disease. Besides his parents the lad is survived by one little brother, Vite.

FOR RENT.

The north side of a double brick house, 118 South Pickaway street. All modern conveniences. Phone 929 or call at 120 South Pickaway street. 12septd4.

MOVED TO COLUMBUS.

Dr. and Mrs. F. E. Ginder and daughter, Miss Violet, have moved from Darbyville to 463 East Tompkins street, Columbus. Dr. Ginder practiced his profession in Darbyville for 23 years and has been quite successful. He has opened an office at 365½ Hudson theater building, East Hudson street, Columbus, and his many friends in this county are wishing him abundant success in his larger field.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices

Sentenced to Jail

Clarence Haddock, a married man charged with contributing to the delinquency of Louise Rutter, a girl under the age of consent, being 14 years old was found guilty in probate court and was sentenced by Judge Adkins to four months in the county jail.

Judgments by Confession.

I. F. Snyder has secured a judgment by confession against Hugh Stevenson, Ella Stevenson, N. C. Stevenson and C. G. Campbell for \$530.45 at 8 per cent interest from September 10, 1927.

Fined For Possession.

Thomas Valentine, who was placed under arrest last week and later released on a bond of \$500 appeared in court Saturday plead guilty and was given a fine of \$100 and costs which he paid and was released.

Marriage Licenses.

Fred Marlock, 26 truck driver, Columbus, and Clara Shaw, 34, Circleville.

Jesse Calvert, 20, packer, Salt-creek township and Rose Steebilton, 18, Washington township. Rev. W. L. Greene.

George Shannan, 21, riveter, Columbus, and Mildred Ruh, East Ringgold. Rev. Gorsuch.

SPIDER BITES FINGER

Miss Florence Garner, who is employed at the Charles Garner grocery corner Pickaway and Walnut street, was bitten on the right hand by a tarantula while handling some bananas Sunday. The sting of the southern visitor made the member swell rapidly. The wound was cauterized by Dr. D. V. Courtright. The sting of this insect is quite venomous in its native home, but the temperate climate of Ohio, reduces the strength of its poison.

TO COLLEGE.

Mr. and Mrs. George G. Adkins and daughter, Miss Evelyn, left Monday morning for Bristol, Virginia, where Miss Evelyn will be a student in Sullins college. They are making the trip by motor and will reach Lexington, Kentucky, Monday evening and Bristol the following evening.

TROUBLE AT DARBYVILLE.

Vircil Slagle got on a high lonesome at Darbyville Saturday night. By the time Marshal Cyrus Hinton learned of the drunken man's condition, and went to place him under arrest he could not be found.

Marshal Hinton suspected the man had been secreted and placed Ernest Brigner under arrest charging him with interfering with an officer, while making an arrest.

The sheriff's department brought Mr. Brigner to this city and he appeared before Justice Friece. He was found guilty and was fined \$5 and costs which he paid and was released.

JAY P. MOFFAT

Jay Pierrepoint Moffat, who has been the secretary of the newly established American legation in Canada, has been appointed first secretary of Uncle Sam's legation in Bern, Switzerland. Mr. Moffat was at one time ceremonials officer at the White House. He recently married Lilla Grew, daughter of the ambassador to Turkey.

PEACEFUL BEAR PEQUOT INDIAN THE HEADLINER

The Ohio History Day association will hold its annual meeting at Logan Elm park on Sunday, October 2. The principal attraction will be Koo-tot-pah-he-too, meaning "Peaceful Bear," a young Pequot Indian chief from Granville, Ohio, where he is attending Denison university. His repertoire consists of native songs and an address on The Indian Past, Present and Future.

Tho the world may owe every man a living, only the persistent collector gets it.

AUTOS COLLIDE ON DARBYVILLE PIKE SATURDAY

One Woman Dies, Another is Dangerously Cut Near Her Jugular Vein.

In an automobile collision Saturday afternoon on the Darbyville pike near the Crites-Jones farm line, one woman was killed and another so badly cut across the throat, that it was feared at the time her jugular vein had been severed.

The Dead.

Ruth Eleanor Phillips, 25, wife of Charles W. Phillips, of Logan.

The Injured.

Charles W. Phillips, back wrenched and bruised; Mrs. Albert Bethards cut on both sides of her throat near the jugular vein and an abrasion on her forehead just above her eye; Albert Bethards, right leg bruised, cuts on wrist and arm.

The dead woman's injuries were a fractured skull, right leg broken near hip, joint, and injured internally. She and her husband were taken in Albaugh ambulance to the Home and Hospital, where Dr. Courtright and Dr. Evans gave them surgical attention. Before passing away the injured woman is said to have made the remark that why are people so careless.

The Bethards were brought in by passing autoists and were taken to the office of Dr. Howard Jones where Doctors Lloyd Jones and Jackson gave them attention. Mr. and Mrs. Bethards accompanied by their uncle, John Carlisle, of Oklahoma, returned to their home in Derby, Saturday afternoon about 3 o'clock.

Mr. Charles W. Phillips Monday accompanied the body of his wife to Huntington, West Virginia, for burial.

Total disregard of traffic rules of the road seems to have been the cause of the collision. The Darbyville pike is as fine a stretch of roadway as there is in the county and accidents such as occurred last Saturday and the loss of life that followed seems inexplicable. Someone erred as the road is wide enough, and if autoists are careful, accidents, and especially collisions will be avoided. In these days of speed, caution continued on page four.

CLUB PROGRAM WILL BE GIVEN THIS EVENING

The Boys' and Girls' club achievement program will be presented at the Jackson township centralized school Monday evening, September 12 at 8 o'clock.

The program will be put on by the club in cooperation with the Farm bureau.

Miss Mary McKenzie will discuss "Feeding and Flock Management for Winter Eggs." The club pageant, "The Spirit of the Home" will be put on. The program will be in charge of the club leaders, Miss Mary Shortridge and Mr. Newell Stevenson.

SOCIAL CALENDAR

The bans of matrimony were published for the first time Sunday for Miss Elizabeth Voll, of this city, and Mr. G. A. Snider of Columbus. The marriage ceremony will take place at St. Joseph's church, this city, Tuesday morning, September 27.

The small boy makes a home run when he hears his mother calling him

Their Turn to Smile

New England farmers who used to bear the brunt of all the jokes about lightning rods, could certainly get a kick out of those thousand-dollar contraptions surrounding the oil tank.

We are prepared to do your cleaning on short notice. We have all the equipment necessary and 20 years experience. Call **BARNHILL.**

First Street Railways

Boston's first street railway was opened in 1850, and Philadelphia inaugurated a similar service the following year. The first street railway in England was at Birkenhead in 1860. In the same year a line was laid in Liverpool, and London's first "train" dates from 1869. The first street railway in France was from St. Cloud to Paris and was constructed in 1856.

Little Things-- but important

Casual spending, for little things, can consume a surprising amount of cash.

And you never realize it's going---until it's spent!

When you're saving money, you get the best idea of how important the little items really are. For small deposits here have enabled many Circleville families and business houses to get a reserve fund that opened new futures of comfort, convenience and happiness.

One dollar will start an account. And our generous 3 per cent interest will add to your savings.

THE FIRST NATIONAL BANK

CIRCLEVILLE, OHIO

"The Bank That Makes You Feel At Home."

Fall Fashions in Paris Limelight

Few Changes Proposed by Designers; Crepes, Velvets Are Favorites.

In these the most important days of the fashion year Paris is a scene of frantic excitement, for the doors of those mysterious regions where the mode is made are swinging wide and we learn at last the aspect of the autumn season.

In the confusion, observes a Paris fashion correspondent in the Philadelphia Ledger, there is great difference of opinion as to the general effect, some houses showing a new silhouette and slightly higher waistline, others avowing that there is and will be no change in line, and as in the case of one prominent designer, only changing the plan of the design inside the silhouette.

The effect of the latter collection may be summarized as sophisticated simplicity, with a decidedly modern art feeling in decoration, quantities of applique and incrustations in very modern flower designs being used.

Diagonal and converging lines, developed by tucks, seams, plaits and applique, carry out his ideas of symmetrical design. Many models consist of any number of sections cleverly combined, the lines converging just above the hip line on one side. The waistline remains for the most part low, but varies slightly. There are quantities of belts in his collection, used on dresses for all times of day.

The favorite daytime materials are crepes, velvets, both plain and printed in small designs, and satins with the dull and shiny sides combined. For evening there is much silk lace of small design, chiffon and georgette.

The general length of the skirt remains unchanged but varies according to the type of gown. Great attention is paid to neck lines, the square being particularly favored, and many evening gowns have a deep pointed décolletage in back.

Sleeves are for the most part long and tight, except those of evening wraps, which have huge novel sleeves with cuffs of fur.

The colors of the collection above mentioned include new and hitherto unimagined greens, blues and blue-greens verging on peacock. There is some rose and a new light red very like pomegranate. Pale maize is a new note for evening. For sports wear, there are new neutral-toned ensembles, the sweater blouses blocked in a cubist pattern looking like solid wool embroidery in three tones, the top coats fur-collared.

All shades of gray are in evidence and frequently several combine in one dress or ensemble, and gray also combines with black. There is much black, both for afternoon and evening, with touches of diamond embroidery or a single jewel.

Afternoon ensembles often consist of a velvet coat cut on straight lines and collared with lynx or fox and a satin or crepe dress in a lighter shade of the same color.

Many houses feature drapery, usually on the side in a puff or choux at the hip line, as in the frocks of Cyber. Nearly every house shows more flare in skirts, achieved by panels, godets, circular sections, fan-plaiting and tiers.

The uneven hemline is also fairly prevalent. Another shows models with circular flares much larger on one side than on the other. Still another favors the higher waist, approaching the normal.

Fall and Winter Coat, Kashmir Cloth in Gray

Showing a charming fall and winter coat of kashmir cloth in gray, with shawl collar and cuffs of gray dyed kid fox fur.

Neutral Colors Favored for Golfing in Paris

Love of golf does not exceed love of clothes with French women.

This season French women golfers make neutral colors the basis of their costumes. A visit to St. Cloud, St. Germain or any fashionable course near Paris shows a preponderance of beige and gray. An occasional bright sweater lights up the links, but hats, stockings and skirts are in neutral shades as a rule.

WONDERFUL INVENTION WILL BE EXHIBITED

At the Radio World's Fair in
Madison Square Garden
New York City.

Devices so delicate and yet so powerful in their potentialities as to stagger the imagination are to be actually operated, for the first time in public, at the Radio World's Fair, in Madison Square Garden, New York City, Sept. 19 to 24, inclusive.

A demonstration of a fire alarm device that literally "sees" and responds to the faintest trace of smoke is a part of the display to be exhibited by the Westinghouse Electric and Manufacturing Company in the theatre of wonders at the Radio World's Fair.

The agency that operates the alarm is a combination of a photo-electric cell and what is practically a standard radio tube—an achievement of Dr. V. K. Zworykin, physicist on the research staff of the Westinghouse Company. The tube is so responsive to light changes that smoke, as faint as a whiff from a cigarette, will be utilized to turn on a red light. When the smoke is conducted between an automobile headlight and the Zworykin device, the consequent diminution of light will lower the electrical current, and this reduction in the activity of the electrons will start a relay that will switch on the red light.

The Zworykin tube is the first invention to make possible the practical application of photo-electric effects. The principle had been a scientific curiosity until the Westinghouse scientists, after nearly two years of work, in the East Pittsburgh laboratories of the company, achieved his goal—the conversion of light rays into mechanical power.

In addition to acting as a fire detector, the device has a number of other practical applications. One of these is the automatic control of light houses in untended stretches of the sea.

With the Zworykin device, such lights may be turned on and off simply by the agencies of light and shadow.

SAGE SAYINGS

Great labor is wasted unless wisely applied.

Mother tongues frequently run to baby talk.

You can't do the right thing the wrong way.

A good laugh is sunshine in a house.

—Thackeray.

Investments, like charity, should begin at home.

Inefficiency is the soil that does not grow success.

Scold a majority and the majority generally laughs.

A baby understands a great deal more than you think.

The longest life doesn't amount to much compared to time.

A man who loves lots of company goes to all the conventions.

Civilization is also the ability to escape the plagues of civilization.

Love thy neighbor as thyself—but know thy neighbor as thou dost thyself.

All men may be made of dust, but some men have a lot more dust than others.

Pity the mortal who has ceased to chase at least one rainbow.—Forbes Magazine.

It sometimes happens that a girl may get rid of a persistent suitor by marrying him.

Millions of people can't be impressed with the idea that they ought to "improve their souls."

A woman likes to have people say that she is young looking and is a member of an old family.

Longer a man lives, the more he is convinced that truth lies deeper than at the bottom of a well.

First Envelopes

Envelopes came into use in the United States and in England between 1840 and 1850. The first practical machine for making envelopes was patented in England in 1844 and the first American patent was taken out in 1849.

Says Oil Prevents Rain
That lack of rain is caused by oil film spread on the surface of oceans by ships that burn oil fuel, is the theory advanced by L. A. Ramdas, a weather expert at Karachi, India. He says that this film, while less than a millionth of an inch thick, may be sufficient to retard the evaporation of ocean water, which is the chief source of rain.

TRADE BETWEEN INDIANS SHOWN

Relics Reveal Barter by Tribes Separated by Geographical Barriers.

Baltimore, Md.—That trade relations existed between the prehistoric Indian groups in America, though they were separated by geographical barriers and tribal enmities, is further evidenced in a collection of archeological objects from the Columbia river valley, in the state of Washington, obtained by the Smithsonian institution. The relics were gathered and are now being classified by Herbert W. Krieger, curator of ethnology at the National museum, under the Smithsonian.

Among the artifacts found by Mr. Krieger at the ancestral homes deserted by the Columbia river Indians more than 100 years ago, are catlinite pipes from Minnesota and pipes from the Pueblo region in the Southwest; abalone shell charms from Alaska; haliotis shells from southern California, and dentalium beads from the Pacific coast.

Establish Link.
The type of subterranean house is identical with that to be found in Alaska, the Aleutian islands, and Siberia, it is said. Yet the Columbia river Indians had no means of transportation to take them over the mountains and they were held to the river for their food supply. As a tribe they were nomad, but individuals made casual trips for trading and hunting purposes.

Mr. Krieger's study, it is announced, has established the link which has been missing to show the continuity of culture among the early inhabitants of America from British Columbia to the Pueblo tribes of the Southwest. Customs sifted through from one community to another, much as the Indians themselves spread, no doubt, it is said, from Asiatic ancestors who drifted in ages ago.

That the Columbia river Indians established themselves in the valley before the time of the domestication of the pig, sheep and horse in Asia, before the invention of the wheel or the cultivation of cereals, seems evident, it is said, from the reconstruction of their civilization.

Master Stone Workers.
The Columbia river valley was thickly settled, possibly the most populous Indian center of early times, according to Mr. Krieger. For 500 miles, from the Dalles in Oregon to the Canadian border, the campsites and burial grounds line the river banks.

These Indians were masters of the stone worker's art, according to the Smithsonian collection. They cultivated only tobacco and got their food from the river and from roots. The dead were cremated with their possessions, or buried in cemeteries on islands in the river.

Samples of the picture writing practiced by the Indians abound. The markings are about one-half inch deep, usually made in columns of basalt.

Animals, such as sheep, goats, deer, and elk, were commonly represented; also the human figure; conventional designs, such as the rising sun, and mnemonic or memory writing, consisting of arbitrary signs understood by the members of the tribe. The writing was apparently more a means of artistic expression than a method for conveying thought, according to Mr. Krieger.

Find Horse Picture.
Only one picture of a horse has been found. It was the introduction of the horse about 1750 which broke up this old civilization in the Columbia river valley, for with the horse the group became mobile. It is an interesting fact, says the announcement, that the horse in North America spread from a nucleus formed by a few which escaped from Coronado's troops in 1514.

Members of the Columbia River Archeological society and others interested in antiquities have done much, it is said, to preserve objects found in the old graves, villages, and fishing grounds. Large collections are in the hands of officials of the Great Northern railroad and residents of Walla Walla, Wenatchee, Quincy, and Seattle, Wash.

First Advertisement in London Paper in 1695

London.—What is believed to be the first newspaper advertisement has been discovered in the files of a London newspaper. It is exhibited at the advertising exhibition and convention held in London during July.

The ad is from a newspaper called "A Collection for Improvement of Husbandry and Trade," published in London, December 13, 1695. It reads as follows:

"A Commander of a very good merchant ship wants an apprentice that hath his Pen well, and understands Arithmetick to assist him in the keeping of Books and doing of Business, and hath Friends who will be bound for his true and faithful Service during his Apprenticeship."

Refers to Dress

New York.—Green chartreuse is to be popular in the spring. It's a shade for millady's clothes. The forecast is made by Miss Margaret H. Rorke, textile color expert, just back from Paris.

BIG BUSINESS

New York.—Carrying out its decision announced two months ago to dispose of its workers' co-operative grocery stores, the Endicott-Johnson Corp., which employs 17,000 people in its shoe factories, New York, September 1 sold all its store to the American Stores Company at Philadelphia, one of the leading chain store groups of the country.

"The Endicott-Johnson stores were originally started at the close of the war to meet the sudden rise of living costs, and since this condition has now been adjusted, there is no further reason for their continuing under our management," George F. Johnson President, stated in announcing the sale of the Endicott-Johnson workers.

The purchase of the Endicott-Johnson stores is the advent into New York State of the American Stores Company, which operates 2,100 grocery and meat shops throughout the middle Atlantic states.

Liquid Lenses Perfected

As substitutes for ordinary lenses, glass shells filled with liquid have been devised by a French inventor, who says that by his process an astronomical lens equal to the usual ground type that would cost \$100,000 and require years to complete, may be made in a few weeks for \$1,000. The fluid substance is inclosed between two hard surfaces, and the new lenses may be used in opera glasses, cameras and microscopes.

The Wrath to Come

President Guth of Goucher college told at a tea in Baltimore an examination story with a moral. "A student," he said, "took it easy through the year, and when examination time came he failed in all seven of his examinations. "Poor father!" he thought, 'and he so proud of me!' "So the student hurried to the telegraph office and telegraphed to his sister: "Failed in all seven examinations. Prepare poor father." "His sister telegraphed back: "Father prepared. Prepare yourself."

STREAM POLLUTION

Residents of Circleville and Pickaway county may finally be relieved of almost intolerable conditions caused by the pollution of the Scioto river by dumping into the stream of the sewage of the city of Columbus.

At one time this summer our people were obliged to boil drinking water or face an epidemic of typhoid fever with its usual death toll. A later analysis of the water showed that it was satisfactory. This "satisfactory" condition was not brought about by any improvement wrought in the filtration system of Columbus, but Providence graciously took care of us by sending copious rains throughout the heated season. Another year we may not be so fortunate. It is not always wise to depend on Providence for results we may ourselves bring about.

Circleville is twenty-five miles south of the Columbus filtration plant, and the situation here is almost unbearable. How much worse it is miles nearer the source of contamination can easily be imagined, but is not so easily described.

We have always held to the belief that under its police powers, the state board of health can do almost anything to preserve the life of the citizens.

However, as results are the only things in which our people are vitally interested, there is no disposition to quarrel about methods. In fact, the residents of the affected territory would much prefer to see this nuisance to life and health removed by voluntary agreement by those who are responsible for the condition, than to have it brought about in any other way.

Recent events leads us strongly to hope that a better day is in sight, and this hope is born of facts outlined in the Columbus Citizen of last Friday, and is there stated so much better than we could hope to do that we quote:

"The city of Columbus is constructing a new intercepting sewer on the east side of the Olentangy river as a step to relieving the pollution of the Scioto river, John H. Gregory, consulting engineer of Columbus, revealed at a conference of the Public Health Conference with Dr. John E. Monger, state director of health, Friday afternoon.

"With the approval of the Public Health Council, Director Monger, issued two orders:

"1: Columbus must eliminate pollution of the Scioto river within two years.

"2: Columbus and Bexley must eliminate pollution of Alum creek within two years.

"Relief from pollution is necessary, F. H. Waring, chief engineer of the state health department, declared at the conference.

"The council adopted a resolution declaring that the pollution is a menace to health.

"Chairman Postle, who was present at the conference, declared he would pass the information on to council.

"Bexley will remodel its separate sewage disposal plant at once in accordance with the order of the Public Health Council, Harley E. Peters, Bexley village attorney, told Director Monger. He admitted the charge of the state inspector that the Bexley disposal plant was overgrown with weeds. This was due, he said, to the fact that the street commissioner who has charge, has too many other duties. He said Bexley council would provide more help at once."

Monarch's Long Reign

Louis XIV, king of France, ruled so long that he outlived his son and grandson and was succeeded by his great-grandson. He reigned for 75 years from his coronation at the age of five until his death in 1715. Liberty.

TESTING THEM

"Tell the janitor to put up notices that no book agents are to be admitted to the building," said the publisher.

"But you have just advertised for agents to sell our new work," protested the secretary.

"Of course I want to try the applicants out. If a man could be stopped by a little thing like that, what good would he be to us?"

NOT PROOF

She—I answered you in the negative, didn't I?

He—But, the negative is not the proof.

Hard Luck

De Mar will never run again, for which he may be pardoned; An amateur he will remain. Because his arteries hardened.

Camouflage

"Can you recite 'The Star-Spangled Banner'?"

"Not all of it," admitted Senator Sorghum; "nor can I repeat all of the Declaration of Independence. But I always send up fireworks on the Fourth of July and am comforted to know that any oratorical efforts on my part to interrupt them would not be appreciated."—Washington Star

Ahead of Time

William Lyon Phelps, literary critic, said at a New Haven tea:

"I was talking to a novelist the other day at a luncheon. He pushed back his mane of hair and murmured wearily:

"I have had a host of imitators." "Yes," said a poet, "especially be forehand."

Reducing

"Is your physician helping you to reduce?"

"I think so," answered Miss Cayenne. "I fancy both father and myself have grown thinner worrying over his bills."—Washington Star.

THE LONG ARM

"And George put his arm around me at least a half dozen times." "When did George develop octopus tentacles, my dear?"

Dull Life

Jack Rolf would watch no golf. His wife would watch no baseball. And so between the two of them they had no sport at all.

The Other Half

The grocer said—I've got just one peck of the finest peas, madam, all ready shelled.

Customer—I'll take half a peck. The grocer divided the peck of peas.

Customer—Is that half? Grocer—Yes.

Customer—I'll take the other half. Tit-Bits, London.

Power of the Press

"Do you stand back of every statement you make in your newspaper?" asked the timid man.

"Why-er-yes," answered the country editor.

"Then," said the little man, holding up a notice of his death. "I wish you would help me collect my life insurance."

Always the Case

Mrs. Brewer—My husband is always busy at something when he is in the house.

Mrs. Stewer—Oh, my husband is always busy when he is in the house—making work for me, you know.

Not Her Name

Telephone Operator—Will you give our initial, please?

Old Lady—B. P.

Operator—B for beer?

Old Lady (indignantly)—No; B for Bertha.

Cog Missing

Bore—Yes, I don't know how it is, but I feel thoroughly wound up to night.

Hostess—How strange! And yet you don't seem to go.

AUTOS COLLIDE ON DARBYVILLE PIKE SATURDAY

(continued from page one)

would permit a person to live longer. The Bethards drove a Buick sedan and in the machine were Mr. Bethard and wife and an uncle, John Carlisle, of Oklahoma. They were returning home to Derby.

The Phillips car was a Dodge sedan. Mr. and Mrs. Phillips were accompanied by her nephew, Clarence Phillips and were returning home to Logan. The boy was not injured. His father was killed in an auto accident a year ago and his uncle and aunt, Mr. and Mrs. Phillips were returning from the Boys' Home at Terre Haute, Indiana, and were taking the lad whom they had adopted to their home intending to rear him.

The Phillips car was struck squarely in the center, on the side and Mrs. Phillips received the full force of the impact.

Ruth Eleanor Phillips was born at Terre Haute, Indiana, and was a daughter of Willis and Ada Kissner Ryan. She was married to Charles W. Phillips at Lima March 30, 1920, and is survived by her husband, her parents, two sisters and two brothers. They are Mrs. Mabel Drake, of Fairbanks, Indiana; Mrs. Ella May Staughbaugh, of Cleveland; Rolla Ryan, of Toledo; and Charles Ryan, of Terra Haute, Indiana.

The remains were taken Monday by the Albaugh company to Huntington, West Virginia, to the home of William Phillips.

Funeral services Wednesday afternoon at 2 o'clock conducted by Rev. Baird, of the Highland Methodist Episcopal church. Interment in Ridge Lawn cemetery, Huntington.

Mr. Phillips is the Logan representative of the National Life and Accident company of Huntington.

Canadian Fisheries

The fisheries of Canada yield about \$44,500,000 a year. British Columbia leads in production with almost half of the total. This is chiefly due to the large catch of salmon.

Doesn't Believe in Spooks

Louise Austen, "daughter of the warden of the tower of London," is a brave girl. She defied the superstition of the headless ghost haunting the chapel royal in the tower and had her wedding there, close to the graves of Ann Boleyn and other victims of the executioner's ax. The bride said she loved to muse in the chapel in her childhood and was more fond of it than of any place she knew.—Brooklyn Citizen.

Economical City Fathers

The city fathers of Jacksonville, Fla., successfully tried a new way of providing music for the frequenters of the city's ten larger parks. One outstanding musical organization was engaged to play in a studio, and the music then was broadcast through batteries of loud speakers in the parks in all parts of the city.

Hens Out of Work

Thousands of hens have been thrown out of work as mothers in California, according to Farm and Fireside, which reports the biggest hatchery known has been found in Petaluma, Calif., where a single setting requires 1,800,000 eggs.

Proverbs Gather Moss

The Anti-Proverb league pridefully points out that Lindbergh couldn't have had any success if he had followed the familiar saw about keeping one's feet on the ground.—Farm and Fireside.

CHILD KING PREFERS "MICKY" TO MAJESTY

He'll Make a Good Fireman, Marie Decides.

Shina, Rumania.—King Michael I. Rumania's five-year-old sovereign, dashed down the concrete walk of the royal summer palace here a couple of days ago in his red-painted, miniature American automobile, almost bowling over Dowager Queen Marie as he went. Ahead of him raced his favorite dog, Mumbo. They imagined themselves going to a fire.

"Madcap Micky," as Queen Marie calls her romping, irrepressible grandson, was shrieking, blowing a whistle and ordering even royalty out of his path. Queen Marie, who was taking a stroll in the palace grounds with the little king's mother, Princess Helen, and former King George of Greece, said jocularly:

"Well, if he doesn't make a good king he surely will make a first-class fireman."

Prefers "Micky" to Majesty. When the correspondent of the Associated Press asked Queen Marie to describe the boy king, she said:

"He hasn't the remotest idea what the events of the last fortnight mean. He can't understand why people make such a fuss over him. He wants to be called 'Micky' and not 'your majesty.'"

"Like all other children, he is intensely fond of fairy tales, and stories of adventure and daring. He exults with joy and triumph when the villain in a legend has his head cut off or when some wicked character is shut up in a dungeon or eaten alive by wolves. He also loves flowers, a trait which I suppose he gets from me. Knowing my love for flowers, he goes to the palace grounds, picks little nosegays and puts them at my bedside in the evening. He also takes delight in swimming, riding his pony and picnicking."

The queen said that the little king always speaks English to his mother and Queen Marie, but Rumanian to others.

Has Few Playmates. "Micky has been kept very much at home by his mother," said Queen Marie, "and therefore hasn't many

playmates. Helen puts him to bed at 6:30 or 7 p. m. in the evening. He is up again by 6:30 or 7:00 a. m. in the morning. Half an hour later he is out on the lawn, playing with his scooter or other toys.

"His chief characteristics are his unusual intelligence, argumentative nature, obstinacy and mischievousness. His mother is very religious, but Micky dislikes going to church because the services are so long."

The queen said that Michael had not fully realized that his grandfather, Ferdinand, was dead, and the little fellow constantly looked for the toys which the late king was in the habit of giving him daily.

THE "GET-RICH-QUICK EXPRESS"

By W. R. MOREHOUSE
Public Relations Commission, American Bankers Association

SO many millions of people have been defrauded out of their savings that it is the most natural thing for them to assume that the failure of any company in which they have stock is due to dishonest manipulations within the company.

W. R. MOREHOUSE

The facts are that many companies go on the rocks financially due to mismanagement and poor judgment and without any intent on the part of those in charge to defraud the stockholders.

Because men of good moral character organize a company for the purpose of engaging in some business enterprise is no assurance in itself that the business will succeed. Good intentions are one thing and business ability another, and usually unless there is plenty of business ability the business fails.

Before you invest in any new enterprise you should not only satisfy yourself as to the integrity of the managers but you should be certain that they have the experience, the technical knowledge and the ability to make the business a success.

What I am seeking to emphasize is the importance of making a thorough investigation before you draw your savings from the bank and entrust them in the hands of persons who may lose them, not through dishonesty but through poor business judgment.

Too many inexperienced investors rely on hearsay and on information too general to be at all adequate, when it comes to parting with their cash. So I say, make it a rule always to go to the bottom of every investment, and as it costs nothing to consult your banker, or the local Better Business Bureau, or the National Better Business Bureau, New York City, leave no stone unturned in order that you get the facts.

If you find that the organizers are trying to avoid an investigation, take that as a tip for making a most searching investigation. In making investments a hasty investigation, or a superficial investigation, is a most dangerous thing. To get the facts about an investment you usually have to dig deep and wide, and no rush investigation permits you to do this. Promoters of the worst type often welcome a hasty investigation, knowing that it does not give the investor sufficient time to get below the beautifully camouflaged surface finish with which they have so adroitly clothed their fake stock.

The road to happiness and contentment lies along the route to safe investment, the road made safe by the slogan, "Investigate Before You Invest."

BETTER FARMING AT LOWER COSTS

By DAN H. OTIS
Director Agricultural Commission, American Bankers Association

PRODUCTIVITY of labor in several industries shows a remarkable increase in output per man since 1914. In the iron and steel industry there has been an increase of 59 per cent; boots and shoes, 6 per cent; leather tanning, 26 per cent; slaughtering and meat packing, 27 per cent; petroleum refining, 83 per cent; paper and pulp, 34 per cent; cement, 61 per cent; automobiles, 172 per cent; rubber tires, 211 per cent. These lowering costs of production have made it possible for industry to face the hazards of over-production.

Industry has laboratories that are lowering production costs. In the agricultural colleges the farmers have their laboratories—experiment stations that are constantly working on problems affecting farmers' interests, and in them many methods have been worked out by which it is possible to increase materially the yield, reduce the cost of production and follow the same business principles that have been followed by industry.

Farm costs may be reduced through improved live stock. If there were only pure-bred live stock on the farms and ranges, we could get along with millions less of animals, and that would release millions of acres for other purposes.

The accompanying table shows what each of seven items of live stock is producing; what each of these items could be made to produce by improved methods, and finally what the saving would be in each class. It gives a total national saving of over two billion dollars.

United States Livestock Production

Kind	Number	Production	Per Head	Possible by Improved Methods			Cost per Head	Total Saving
				Per Head	Number Needed	Reduction in Number		
Dairy cows.....	22,290,000	9,198,303,635 gal.	412 gal.	769 gal.	13,017,181	9,272,819	\$600.00	\$834,553,710
Beef.....	9,853,000 head	4,935,000,000 lbs.	501 lbs.	1 yr. 300 lbs.	9,853,000	6,187,500	75.00	276,318,750
Mutton and lamb.....	12,001,000	467,000,000 lbs.	38.8 lbs.	50 lbs.	9,340,000	2,661,000	8.00	21,616,000
Sheep.....	35,500,150	227,105,177 lbs.	6.38 lbs.	8 lbs.	28,388,147	7,202,012	8.00	57,616,000
Pork.....	43,043,000	5,860,000,000 lbs.	136 lbs.	6 mo. 150 lbs.	39,066,667	3,976,333	37.50	637,445,830
Brood sows.....	9,176,000	9,210,000,000 lbs.	1000 lbs.	1500 lbs.	6,140,000	3,030,000	15.00	45,540,000
Chickens.....	409,200,849	1,913,245,129	50 eggs	135 eggs	170,066,229	239,134,620	2.25	538,255,395
Total.....								\$2,389,729,702

*Slaughtered and inspected. †Dressed weight.

From this table it will be noticed that, if we could obtain a reasonable average production per head, then the number of milch cows could be reduced from 22,000,000 to 13,000,000, or a reduction of 9,000,000, and still maintain the present supply of dairy products. This would involve increasing the production per cow from 3,549 pounds of milk to 6,077 pounds, an increase easily possible through good selection, breeding and feeding.

Beef animals vary in age all the way from one to three years. The present number of animals slaughtered and inspected would be sufficient under improved methods to produce the present amount of beef, and

feed the animals only one year. Taking the amount of food that could be reasonably obtained from a two-year-old we find that it would be possible to keep up the present supply of beef and cut down on the number of animals slaughtered by 3,684,000. This would mean great savings in feed.

In a similar manner our present supply of slaughtered and inspected

mutton and lamb could be supplied with 2,661,000 less animals, and it is possible to furnish our present supply of wool and reduce the number of sheep by over 7,000,000.

Our pork products are now produced from swine that average 135 pounds dressed weight. Under improved methods we ought to get pigs that would produce 150 pounds dressed weight at 6 months or 225 pounds at 9 months. At the latter age it would be possible to maintain the present supply of slaughtered and inspected pork and cut down nearly 17,000,000 on the number of hogs to produce it. Similar analyses apply to the other items listed in the table.

PERSONALS

Isaac M. Young was a business visitor in Columbus today.

Edward Shanton was a business visitor in Columbus today.

Lewis Drake, of New Holland, was a business visitor in Columbus Monday.

T. F. Solt, of Detroit, Michigan, is visiting his brother, William Solt, near Ashville.

Mr. William Crissinger spent Sunday with Mr. and Mrs. S. W. Klinger and family at Chillicothe.

J. C. Tinkey, of Tarlton, deputy state sealer of weights and measures went to Chardon Monday to make an address before a meeting of deputy county sealers of weights and measures.

Miss Clara Lindsey has returned to Cuyahoga to resume her duties as teacher in the public schools. Miss Lindsay was recently awarded a 4-year provisional certificate by the state board.

Miss Lillian Arbenz, of Wheeling, West Virginia, fiancée of Harry W. Moeller, is a guest of his mother, Mrs. Elizabeth Moeller and sister, Miss Gretchen Moeller, of South Court street.

Mr. and Mrs. Salem Aldenderfer, of Minden, Michigan and Mr. and Mrs. C. E. Aldenderfer of St. Louis, Missouri, have returned home after a visit with Mr. and Mrs. Aden Aldenderfer and other relatives.

Miss Mabel Dumm, a student at the Office Training School, Columbus, spent the weekend at home.

Lawrence McKenzie, a student at the Office Training School, Columbus spent Sunday at home in Pickaway township.

Mr. and Mrs. Eber Drum, Mr. and Mrs. Charles Delong of Stoutsville, and Mr. and Mrs. Paul Drum and children; David and John, of Lancaster, were dinner guests of Mr. and Mrs. John H. Drum, of North Court street, Sunday.

Mr. and Mrs. Charles Skinner of Detroit, Michigan; William Skinner, of Marion; and Mr. and Mrs. Russell Skinner and daughter, Claudine, of New Lexington, were Sunday guests of Mr. and Mrs. C. G. Skinner of 408 East Mound street.

Mr. and Mrs. Leslie D. May and family, Mr. and Mrs. William Ashbrook, Mr. and Mrs. P. W. Ashbrook and family and Mr. and Mrs. F. C. Blue of Columbus were guests Sunday of Congressman and Mrs. William A. Ashbrook at Johnstown, Ohio.

Chair of Dietetics Wanted

Two contributions of \$50,000 each have been made toward the establishment of a chair of dietetics in the University of London. The gifts are in line with the movement to give the medical profession and others an opportunity of widening their knowledge of food values, and through them, benefiting the public. One contribution was given anonymously by a woman, and the other by a manufacturer of dietetic preparations.

Reaper's Centenary

This is the centenary year of the reaping machine, the early appearance of which, obviating the necessity of large numbers of scythemen, was bitterly resented by agricultural laborers. Dr. Patrick Bell, a minister of Carmyle, Arbroath, Scotland, invented it while he was a student at St. Andrews' university, and the presbytery of Arbroath has appointed a committee to consider the best method of celebrating the centenary of Bell's invention.

EASY TO TRANSFER THAT POST OFFICE

Postmaster Robert G. Hill of Grand Rapids said at a recent luncheon:

"Our postal service is excellent because excellent salaries are paid and excellent quarters maintained. It wasn't so in the past.

"There's a story about a post office inspector who on his annual visit to Paint Rock found a lot of fault with the Paint Rock postmaster. This gentleman ran the post office in a corner of his general store.

"Well, the inspector gave the Paint Rock postmaster a terrible rigging, and then said, as he got into his buggy to drive on to the next town:

"You'll hear from the chief, Mr. Scraggs, when I get back to headquarters and report about you."

"This was too much for Scraggs. He stalked into his general store and was back in a couple of minutes with a cigar box that contained some stamps and coppers and a couple of little memorandum books.

"Here," he said, "take yer darn post office and get out."

United States Ahead

of World in Reading

Some self-confessed intellectuals question the high plane of the American's taste for reading matter but they cannot deny that the American reads more than the other peoples of the world. Government statistics disclose that there are 20,001 newspapers in the United States and that the country's book business last year was \$130,000,000. The nation consumed 10,000,000 tons of paper last year. In face of these amazing figures none can complain that Americans do not read enough. If we don't read classical literature all of the time we at least read and that is a healthful sign. A comparison of paper consumption reveals that more paper is required for the United States than for all of the rest of the world and that this country's consumption per capita is more than twice as great as that of the next largest user of paper—Bangor Commercial.

AMUSEMENTS

Richard Dix dug deep down in his pocket and brought up a winner when he decided to make "Man Power" for Paramount. It will arrive at the Met Monday and is by all odds the best picture he has ever appeared in.

Directed by the man who has made some of Bebe Daniels' finest pictures Clarence Badger, adapted by Sam Mintz and Ray Harris from a Byron Morgan story, scenarized by Louise Long, photographed by Ed Cronjager and enacted by a cast which includes Mary Brain and Philip Strange "Man Power" shapes up as tip-top entertainment for men, women and children.

It is clean, fast, likable melodrama and you'll enjoy all of Daredevil Dix' exploits. You'll cheer as Richard gets his broken down auto tractor to move and you'll fall in the slough of despair as it falls him at a crucial moment. You'll laugh when Dix vanquishes his villainous rival for Miss Brain's hand and shouts of encouragement will come again and again as Dix finally gets his old machine to start up a perilous, rain-soaked hill in order to reach an overflowing dam in time to save the valley town below. Here are thrills—lots of them!

"Man Power" has lots of that certain something which has always been associated with Dix dramas—speed! It's full of z-zip and nerve at each turn of the projection machine. Yes, without a doubt "Man Power" is well worth seeing.

AMUSEMENTS

TERRY'S UNCLE TOM'S CABIN. A PLAY AND COMPANY THAT WILL LIVE FOREVER.

Harriet Ward Beecher Stowe's famous and much talked of slave play of days before the Civil war, as originally dramatized by G. L. Aitken, will be presented at Circleville for one night performance only Thursday, September 15, by Terry's big company that has been presenting this well known play for the past thirty-three years, under the largest waterproof canvas theater on the road.

The Terry show this season is one that cannot be forgotten from the fact that the performance they gave surpasses any previous attempts, no expense having been spared to make this production the most complete ever presented. The massive scenic and electrical effects used in the play are built upon the largest and most lavish scale ever attempted. The presenting cast comprises the very best dramatic talent that can be secured, and the bands and orchestra are composed of the very best musicians that are to be found in the musical world. Another feature is the pack of genuine Siberian bloodhounds—Terry having the largest and most expensive pack obtainable. The company travels in its own especially constructed cars. There will be a big band concert at 7 p. m. on the principal streets. 10 Sept d3.

Large Never Conquered

and one of the most difficult of all. The famous Matterhorn, at the head of the Zermatt valley in Switzerland mountains to the climber, has on its left flank a ridge that has never yet been conquered and which, according to experienced guides, never will be. This ridge rises steeply from the snow fields to about 13,000 feet and is surmounted by a cliff which rises from there nearly to the real summit, 14,830 feet high.

"Words of Christ"

The word "Agrapha," a name used to describe the documents reporting the perpetuated sayings of Christ, was first used in this connection in 1776 by J. P. Korner. The technical meaning of the word as the title of this book was accepted in literary parlance in 1880. At present the word means "writings giving citations of the actual words of Christ."

TO HOLDERS OF
SECOND LIBERTY LOAN
4 1/4 PER CENT BONDS

EXCHANGE OFFERING OF NEW
TREASURY NOTES

Second Liberty Loan bonds have been called for payment on November 15th next, and no interest will be paid after that date.

Notice is given of a new offering of United States Treasury notes, in exchange for Second Liberty Loan Converted 4 1/4 per cent bonds. The new notes will be dated September 15, 1927, and will bear interest from that date at the rate of 3 1/2 per cent. The notes will mature in five years but may be called for redemption after three years.

Interest on Second Liberty Loan Converted 4 1/4 per cent bonds surrendered and accepted in exchange will be paid to November 15, 1927. The price of the new issue of notes, is 100 1/4. Holders surrendering Second Liberty Loan Converted 4 1/4 per cent bonds in exchange will receive, at the time of delivery of the new notes, interest on such Second Liberty Loan Converted 4 1/4 per cent bonds from May 15, 1927, to November 15, 1927, less the premium on the new notes issued. Holders of Second Liberty Loan Converted 4 1/4 per cent bonds who desire to take advantage of this opportunity to obtain Treasury notes of the new issue, should arrange with their bank for such exchange at the earliest possible date, as this offer will remain open only for a limited period after September 15th.

Further information may be obtained from banks or trust companies, or from any Federal Reserve Bank.

A. W. MELLON,
Secretary of the Treasury.

Washington, D. C., September 6, 1927.

Relieved His Feelings

"Had a good lecture on Alaska, didn't we, Zeb?" asked one of Mr. Gorton's neighbors, meeting him the next morning. "To sit there by the radio peaceful as pie for two hours hearing him reel off the information was a grand rest for me, beat out with cranberrying as I be."

"It was a good enough talk," admitted Mr. Gorton, grudgingly, "but it didn't rest me any to speak of. Having to sit stock still without a chance to get in a word for two mortal hours, I was pretty well worn out afterward. But I took the lantern out in the woodshed and by the time I'd split up a week's kindling I felt kind of rested and calmed down."—Kansas City Star.

GERMANY'S VIEW

Stresemann Says Peace Cannot
Come Unless Troops Are
Withdrawn.

Geneva, Sept. 9. — (U.P.)— Foreign Minister Stresemann of Germany addressing the League of Nations assembly today said it would be impossible for the spirit of peace to have its full course so long as German territory was occupied by foreign troops.

The foreign minister announced that Germany would sign the optional clause in the Hague Court Protocol accepting the obligatory jurisdiction of the court in international disputes.

Emphasizing the modern importance of economic and material relations, Stresemann expressed the opinion that the next war would be an economic war.

POOR OF NEW YORK
IN EVIL CONDITION

With the general increase of luxurious apartment houses for the wealthy the New York city health department is endeavoring to bring before the public the fact that housing conditions in certain parts of the lower and extreme upper East side have not kept pace with the sanitary progress of the rest of the city. The infant mortality and general mortality rates and the tuberculosis rate of these parts is considerably higher than the rates for the city as a whole. Field nurses from the department have recently completed a house-to-house survey of these districts. The conditions disclosed Louis I. Harris, health commissioner, describes as menacing and intolerable. Bedrooms are crowded and badly ventilated. Many families live in basements. Scattered throughout the sections are factory buildings which the commissioner regards as having a definite influence upon the health of the children. Doctor Harris hopes to arouse the city to the need of remedial measures.

Early Biblical Division

The first division of the Bible into verses was made by Stephens, the printer, in 1551.

Breaks Closed-Car 2,000-mile Record

Then during night skidded in rain storm, turned over several times, received body repairs only

Then Finishes 15,000-miles at 62.709 M.P.H.

For more than 30 hours, averaging better than 65 miles an hour, this strictly stock Auburn Sedan had been whirling around the Atlantic City Speedway day and night.

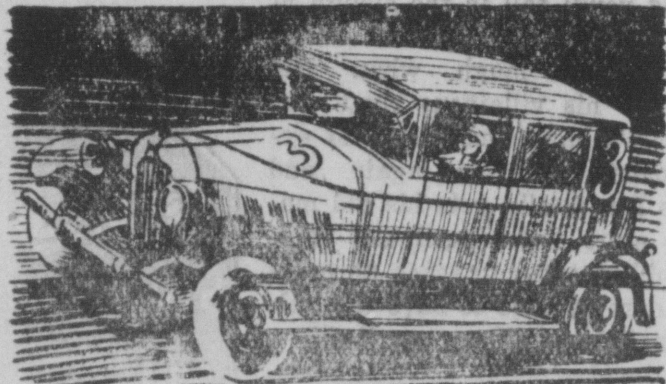

Then came a terrific rain storm. Wet track. At 70 miles per hour the driver dozed, the car crashed.

Radiator and body repairs were made. Seven hours had been lost. But the Sedan went back into the test with the same driver. It caught up with the other two Auburn stock cars and finished the unprecedented distance of 15,000 miles.

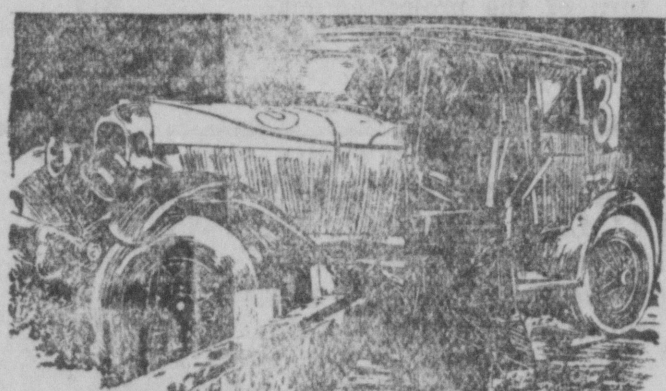

After the accident, the car was declared non-stock, as it was no longer complete—exactly as sold, but its time continued to be officially recorded by the A.A.A. The longest, hardest and fastest official test ever given a closed car.

Unheard of as this performance is, it was only an incident in the 42,000 miles of official stock car test Auburn conducted, breaking all records for completely equipped stock cars from 5 to 5,000 miles, and establishing new stock car records from 5,000 to 15,000 miles.

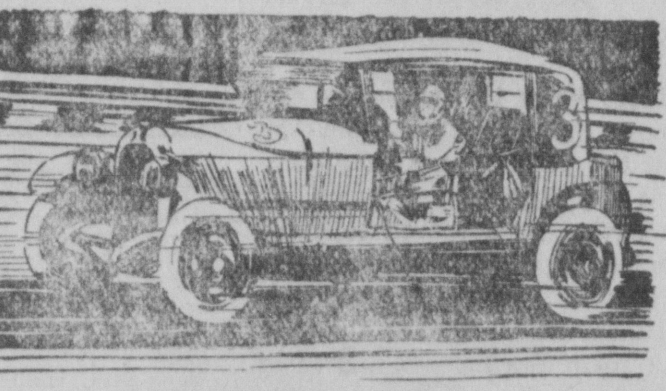

The purpose of this extreme and hitherto unattempted stock car test, was to demonstrate by three times greater proof the supreme leadership of Auburn cars in speed, endurance, durability and efficiency. Your Auburn dealer has exact duplicates of the Auburn cars that made these phenomenal records.

Drawing made from actual photograph
The Auburn Straight Eight Sedan, one of the three fully equipped stock cars in the Atlantic City Speedway endurance test. The car is shown traveling better than 70 miles an hour after breaking closed-car 2,000 mile record at 65.583 miles per hour.

Drawing made from actual photograph
About the middle of the second night of this continuous run, when the track was wet as a result of a rain storm, the driver dozed. As a result, the car going at high speed skidded. It hit the guard rail and turned over. The sturdy construction of Auburn resisted this smash so well that only body damages resulted. The driver was unhurt.

Drawing made from actual photograph
Here is proof of stamina! After 7 hours for photographs and body repairs, this sedan went back into the endurance test, driven by the same driver, and finished the remainder of the 15,000 miles at an average speed of over 67 miles an hour for the net running time for the entire distance.

Enjoy Your Home

--- All of It ---

This winter many families will LIVE ALL OVER THEIR HOMES—using all the rooms, enjoying the comforts of ALL of their furniture, for they will use the modern Cabinet Heaters.

Others will live in one or two rooms, close up the balance of the house for the winter, all on account of the inefficiency of the old type of heating stove. They will hover around the old stove in an effort to keep warm, while the other folks will be enjoying themselves all over their homes, for the reason that they are using one of our circulating Heaters.

There is no "guess-work" any more about these new heaters doing the work for which they are intended. We have sold them for the past five years AND THEY DO WORK. Ask any of our users—we'll be glad to tell you who they are and where they live.

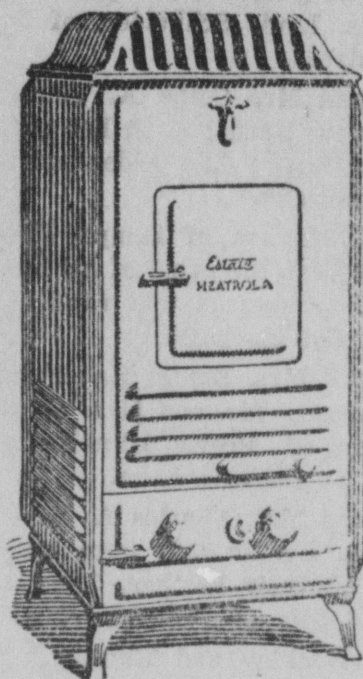

CIRCULATORS

For All Sizes of Pockets-Books---Here They Are

First comes the Old Reliable

Estate HEATROLA

There is only ONE Heatrola—ESTATE builds it

Then there's the

SOLAR PARLOR FURNACE

The outer casing is Porcelain Enamelled, with Grained Mahogany finish. It is one of the largest and most powerful heaters on the market. The manufacturer had the farmer in mind when he built this heater. It has an 18 inch fire-pot, with boiler plate body. It has heating capacity of 12,000 cubic feet, or enough to easily heat six to eight large rooms. It is 54 inches high, and 24 inches square. A beautiful piece of furniture as well as a very efficient heater.

Price is only **\$125.00**

Next in Line Comes

—THE RADIO—

It has a heating capacity of 8,000 cubic feet, or enough to heat five to six rooms comfortably. It has a 16 inch fire-pot, and stands 50 inches high, and 22 inches wide. Finished in a beautiful Mahogany finish. This heater sells at **\$90.00**
Price

The Radio, same as above, with the exception that the finish is plain black, with nickled corner pieces, sells at the extremely low price of only \$64.50. Why buy the old fashioned type of round heater when you can buy a parlor furnace for so little?

A Real Heater for the Money is

THE CABINET

This type is built like a smelting furnace,—with a lining of fire-clay. They have been used under the most trying conditions, heating warehouses, and the results were most satisfactory. We have them in two sizes—16 inch pots with a capacity of 8,000 cubic feet, and 18 inch pots with a capacity of 10,000 cubic feet.—PRICES—

16 inch plain black finish \$50.00
16 inch Mahogany finish \$75.00
18 inch plain black finish \$65.00
18 inch Mahogany finish \$85.00

Yes, we still have some Round Heaters

Used and New—Florence used—Moore's Air-Tight used—Round Oak used and new—and others. All of them at a price that will interest you. If you are needing a heating stove, it will pay you to visit our Stove Department.

OFF FOR SCHOOL

Circleville Loses Many of Its
 Younger Citizens With the
 Opening of School.

With the opening of each school year parents are confronted with the thought that for the next nine months they will only have a short visit with their children who leave home to attend school in other cities. This year the number leaving will make quite an impression on the younger social circles and the Holiday vacations are already being planned when they will again be united for a short time.

Miss Gladys Wentworth and Carl Toensmeier leave next Sunday for Wooster College, Wooster, Ohio.

Miss Iola Wentworth will enter the Columbus Art school, where Ralph Smith is also enrolled.

Misses Mary and Effie Anderson will go to Ohio Wesleyan at Delaware.

George Gerhardt goes to Ohio Northern University, Ada.

George William and Gus Groom, John Abernethy and Glenn Vanscoy have enrolled in St. Xavier College, Cincinnati.

To Capital University go Misses Eula Dowden, Eleanor Fitzpatrick, Evelyn Fohl, and Priscilla Trimmer; Carl Leist, Hillard Gehres, Harry Boyer, Irwin Leist, George and Gladden Troutman.

Miss Eloise Hilyard and Carl Mason, enter Ohio University, Athens.

To Muskingum College, New Concord, Ohio, goes Scott and Allen Eagleson, George Vlerbome and Theodore Heiskell.

Miss Lucy Seall will enter Otterbein College, Westerville.

Misses Mary Alice Bales, Ruth Mack, Eleanor Ryan, Louise Mason and Kathryn Marion enter Ohio State University.

Miss Helen Snyder will attend the Morey School of Music in Columbus.

Miss Agnes Newmyer, Columbus School for Girls and Miss Mary Ellen Phillips and Robert Long, Office Training School.

Misses Marion and Helen Hilt-

ler and Kathryn Mav will go to Randolph-Macon College, Lynchburg, Va.

Miss Evelyn Adkins will go to Bristol, Va., to enroll in Sullins Academy. George Hitler and Joseph Adkins will leave shortly for Kenyon College, Gambier, Ohio.

Theodore Goeller will go to the University of Colorado.

Miss Alice Ada May will enter Goucher College, Baltimore, Md., for her second term.

Lemuel Weldon will attend the Yale University Law School.

Renick Caldwell, John Courtwright, David May go to Cornell University, Ithaca, N. Y.

Dudley Courtwright to Dartmouth College.

Miss Ann Bennett to Birmingham School, Birmingham, Pa.

Misses Mary Crist, and Helen Steele have entered Mt. Carmel Hospital school for nurses, Columbus.

One Bill Later

"I'm sorry I can't pay you today," said the debtor. "My shoemaker's just been here!"

"Yes, I know," said the tailor. "He told me that you hadn't paid him because you expected your tailor. Here's the bill!"—Boston Post.

Judge's Job

Magistrate—How often have you been here before?

Prisoner—I thought you were scoring.

Old Type Wanted

"I suppose you want to marry a girl as near like your mother as possible?" "No. I'm going to marry an old-fashioned girl."

Good Substitute

Williamstown, Mass.—Football has been substituted for head hunting among some Filipino tribes, who report the gridiron pastime "almost as satisfying," says C. C. Batchelder, ex-secretary of the interior.

For the Overpractical

A wild flower is one of life's extras; one of those things we do not have to have but which we enjoy all the more for that reason.—American Magazine.

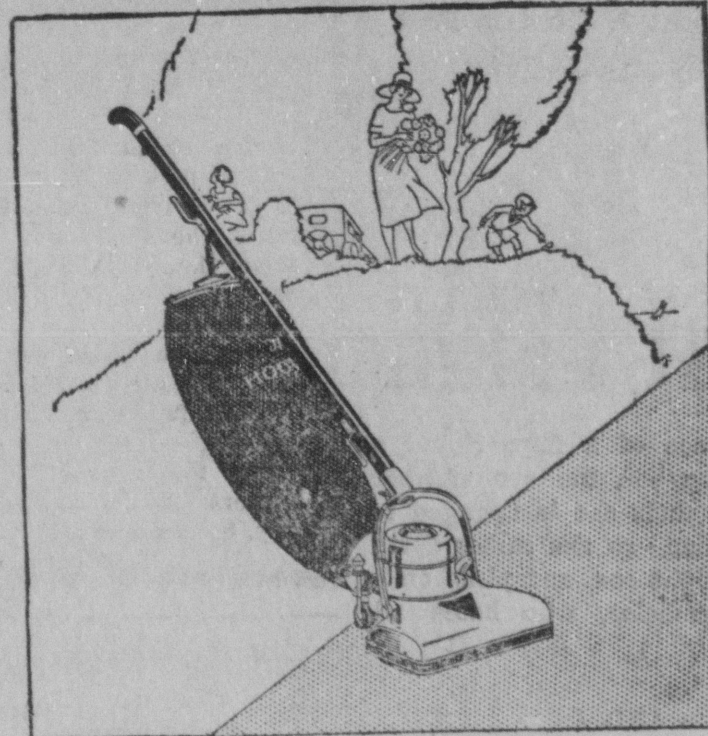

Genuine Refiners' Ethyl Gas can only be obtained from The Circleville Oil Co. Don't use a substitute. 20augd&wtf.

Chinese Invented Coins
 Hard money or coins were invented by China in 1000 B. C., by Greece in 700 B. C. and by India in 500 B. C.

Kangaroo Outstrips Horse
 In a recent race between an Australian race horse and a kangaroo, the latter far outdistanced the horse.

The HOOVER

It BEATS... as it Sweeps as it Cleans

Positive Agitation means a lifelong vacation from drudgery

DIRT never takes a vacation. Day-long, month-long it sifts and filters into the home, to find a favorite hiding place in carpets and rugs.

That means drudgery for the homekeeper, a never-ending and never-won struggle.

But now the homekeeper has a new friend and ally in her fight against dirt, one offering her a life-long vacation from the drudgery of cleaning by old methods.

This new friend and ally is

The Hoover and "Positive Agitation"—enabling faster, easier, deeper cleaning of floor coverings than ever before.

You can enjoy its benefits now not only in the world-famous Model 700 Hoover but in a lower-priced Model 543 Hoover as well.

Dusting Tools, \$12.50
 The Model 700 Hoover, \$75
 The Model 543 Hoover... **\$59.50**

Easy payments if desired. Only \$6.25 down. We will give you a liberal allowance for your old cleaner. Phone us today for a free home demonstration.

BARRERE & NICKERSON,
 CIRCLEVILLE, OHIO.

THE SUN NEVER SETS ON CHESTERFIELD'S POPULARITY

Popular in all 4 corners of the Earth...

in Bombay...

and all along "the road to Mandalay"

IN THE newspapers of Bombay, Calcutta and Rangoon Chesterfield advertising speaks of "wrapper-packets" and prices are in rupees... but you may be sure it's the same Chesterfield that you buy in every corner of the U. S. A.

Chesterfield's success in far-off India is typical of its world-wide popularity. Smokers of every race and creed appreciate the natural tobacco taste and fragrance of this famous blend.

Titles to Publications

The courts have held that the title of a publication may become a trade mark. The United States patent office has granted trade mark registration of such titles in a considerable number of instances. The courts grant protection in connection with trade marks of this kind, just as in the case of trade marks in general.

Employer Prefers

Dirty Faced Boys

London.—Dirty-faced youths make excellent office boys when given a good scrubbing. The Westminster juvenile employment advisory committee has concluded after numerous experiments.

Some employers prefer dirty-faced boys to begin with. One employer wrote to the committee: "I want an honest little tough with rather dirty knees and a soiled face, and thoroughly understanding that life is a struggle and the devil takes the hindmost. I prefer them (i.e., boys not devils) to be short, sturdily built, either fair and dirty faced, or dark and red faced, with just a suspicion of a cold in the head."

The advisory committee commenting on the request for a "little tough," says: "All employers are not so easy to satisfy, by any means."

Girls' Feet Cramped Into Small Shoes

Washington.—The desire to have small feet is by no means confined to the women of China, judging from the report just issued by the American Home Economics association on effects of various types of shoes on the feet of high school students.

A study made by Prof. Katherine Cranor of Iowa State college and by Maude Eastwood Little, covering 311 high school girls, showed that shoes both too short and too narrow were worn by 269. Only 28 wore correct length and 14 correct width shoes.

The shoes were examined as to type, length and width. Next the feet were measured and examined for defects. Only one student was found to have normal feet.

Despite the fact that high school girls are supposed to be of flapper age and tastes, the investigators did not find the high heel much in evidence. Oxfords were most commonly worn, though the older girls wore pumps frequently. Only about 75 per cent of the shoes had been fitted on the wearers when purchased.

Urges Parents to Be "Pals" to Children

New York.—Education will not advance as it should until parents take a more active interest in it for the sake of their children, believes Mrs. Florence V. Watkins, executive secretary of the National Congress of Parent-Teacher Associations.

"Parents haven't played enough with their children," says Mrs. Watkins, who is conducting a course on "the Parent-Teacher movement" in the summer session of Columbia university.

"They have been censors instead of playmates. They should come down from their pinnacles and become their children's pals. Parents, however, are more alive to the possibilities of training the child through the first six years of life. Teachers are more sympathetically inclined to problems confronting the home. Communities have become more concerned in making conditions right for the child."

Nature's Still

"The moon retains only the water vapor which freezes. The rest is condensed into moisture, some of it on the earth," says a scientist. Moonshine, eh?—American Magazine.

VON STEUBEN'S DRILL BOOK FOUND IN OHIO

Rare Volume Is Found in Old Bureau Drawer.

London.—Phantom memories of the days of George Washington and the establishment of this nation are revived by the relic of the early days of the United States of America found in an old bureau drawer by Mrs. Bettie Wilson Neville of this city.

The relic is an old book, said to be one of the only two copies in existence, the other being guarded jealously at the United States military academy at West Point.

It is the first drill book of the United States army, prepared by Baron Von Steuben, friend and aid to Gen. George Washington at Valley Forge, and it bears the publication date of 1794 and is entitled:

"Regulations for the Order and Discipline of the Troops of the United States, to which is added an appendix, containing the United States Militia Act, passed by congress May, 1792. A new edition illustrated by eight copper plates accurately engraved. By Baron Von Steuben, late major general and Inspector general of the army of the United States, No. 46 Newbury street, Boston, MDCCXCIV."

Offered \$1,000 for Find.

Mrs. Neville says Henry Ford has offered her \$1,000 for the book, but she intends to keep it, together with other old books which she treasures.

Quotations from the book which follow are particularly interesting to military men today, especially those who served in the recent World War.

"The arms and accoutrements of the officers, noncommissioned officers and soldiers should be uniform throughout.

"A company is to be formed in two ranks at one pace distance, with the tallest men in the rear, with the shortest men in the center.

"A company thus drawn up is to be divided into two sections or platoons, the captain to take post on the right, covered by a sergeant, and so on through all the minute details of the army regulations.

Covers of Wood.

Rookies were treated to a real, man-size code of drilling, some of the regulations being:

"The position of a soldier without arms—He is to stand straight and firm upon his legs, with the head turned to the right so far as to bring the left eye over the waistcoat buttons, the heels two inches apart, the toes turned out, the belly drawn in a little," etc.

"Attention—at this word the soldier must be silent, stand firm and steady, moving neither hand nor foot," and so on for ninety-one pages, closing with the order to the private to "always carry a stopper for the muzzle of the gun in case of rain."

The covers of the old book of Mrs. Neville are made of wood, covered with paper.

Oklahoma Land Office Retires From Business

Guthrie, Okla.—The latest landmark to disappear in the frontier in the West, and in Oklahoma in particular, is the United States land office at Guthrie which was closed and discontinued by executive order recently.

"Lack of business" was the reason given for the discontinuance of the office. All records and what little business remained will be taken to Washington and placed in the offices of the Department of the Interior.

The Guthrie land office saw its first business at noon of April 22, 1889, when the famous "run of '89" was made into Oklahoma Territory. It was the only building for miles. Government agents were on duty ready to register claims and issue deeds and titles.

From that day forward the little office literally did a "land office" business, the city of Guthrie growing up around the little shack. The little shack has long since gone, but the office was housed in the federal building at Guthrie.

What to Do With Old Safety Razor Blades

Boston.—F. M. Durkee of Brookline has solved one of the world's great problems: What to do with old safety razor blades. Seven years ago illness left him too weak to push a lawn mower and the green grass grew all around. So he mounted the motor of an old cleaner on a flat axle connecting a couple of toy cart wheels.

Through holes he bored in the axle he ran shafts about 4 inches long and 3/4 of an inch in diameter. At the tops of these shafts he put pulleys and connected them by a sewing machine belt to the shaft of the motor. On the bottom of the shafts he fastened thin brass discs about 4 inches in diameter and finally bolted the razor blades to the ends of these discs.

A long lamp cord conveyed power from a plug in the house to the handle of the mower and thence to the motor. The machine was light. Durkee could push it easily while the power whirled the cutting discs and the green grass flew all around.

Flies Change Styles

Bridgend, England.—A plague of horseflies has changed styles here. Dresses are longer, with wide sleeves and high necks. Woolen stockings are popular.

LIGHTNING KILLS HOGS.

One of the heaviest losses in some time from a lightning bolt striking stock was reported at London, Sunday from the farm of J. C. Tenney, of Sedalia, near Madison county.

Lightning in the electrical storm which visited London killed 30 fat hogs for Mr. Tenney while the animals were huddled together in the barn lot seeking shelter from the storm.

NEW CASHIER AT

WESTERN UNION.

Miss Willetta Burns has secured the position of cashier at the office of the Western Union Telegram company.

BALLOON RACE ENDS IN THE CAROLINAS

ANNUAL GORDON BENNETT CUP RACE STARTED SATURDAY

Detroit Bags Drift Toward Florida Coast—Four Come Down In the Land of the Skies—German Entrant Lands On Sugar Island, Lake Erie—Italian Balloon Is Still Up and Sailing At Last Reports

Continuation of a slight general trend of the wind toward the southeast Sunday led officials in charge of the annual Gordon-Bennett balloon race at Detroit, Michigan, to believe a majority of the boys were wending their way toward the Florida coast.

Fifteen balloons started. Officials expressed the opinion that it would be a week before the result of the race could be decided.

Absence of reports from others during Sunday led to the belief that several were still in the Great Lakes out of sight of land.

While over Amherstburgh, the Lafayette dropped a note stating that air current indications then were toward the southeast and showed no signs of varying.

A number of balloons in the Gordon-Bennett cup race are believed to be hovering over eastern and central North Carolina with two or more over South Carolina or northern Georgia.

The balloon Belgica, Ernest De-Buyter, reserve officer of the Belgian army, pilot passed over Charlotte, North Carolina, at 4:30 p. m.

Asheville reported two balloons, one traveling in a southwesterly direction at a great height.

A telephone message at Asheville from Spruce Pine, North Carolina, in the heart of the Great Smoky Mountains, reported that two balloons had been seen, but could not be identified. One was traveling toward Marion, North Carolina, it said.

Two hours later two bags passed over Marion, traveling south.

The U. S. army entry, piloted by Captain W. E. Kepner, dropped low over Lenior, and landed his radio set with a parachute.

A balloon, thought not to be one of those reported in the western part of the state, passed over Durham, North Carolina, Sunday night about six o'clock traveling southward. Durham is 150 miles from any of the other points and somewhat to the north.

The Belgian balloon, Wallonie, in the Gordon-Bennett race, descended six miles south of Greenville, South Carolina, at 7:30 o'clock Sunday night without injury to either Pilot H. Quersin or M. Theis, his aide.

The U. S. army balloon entry in the Gordon-Bennett cup race, landed at York, South Carolina, Sunday night.

The army balloon, last to leave the Detroit field, landed without injury to the bag or pilots. Captain W. E. Kepner, the pilot, and Lieutenant W. O. Earickson, aide, immediately began packing the big bag for shipment to Davis Island, New York.

Kepner said that during their trip over western North Carolina mountains the bag was sucked up to a height of 27,000 feet, causing it to lose gas and forcing them to discard all ballast and some equipment.

FAUSNAUGH PUBLIC SALE.

The first public sale of the season was held last Friday near East Ringgold by Roy Fausnaugh. The sale was well attended; horses sold as high as \$187; cows \$80. C. G. Chalfin was the auctioneer. Wayne Hoover, clerk.

The one thing a wife will cheerfully admit to her husband is that she can't think of any reason for having married him.

The Paris-Bruxelles balloon, piloted by Maurice Bienaimé, with A. Veenstra as aide, landed safely two miles from Dunn, North Carolina at 5:50 p. m. Bienaimé said the bag passed thru a number of storms and at one time ascended to 15,000 feet.

With its gas valves jammed and refusing to function, the German balloon Brandenburg, which left Detroit Friday in the Gordon-Bennett cup race landed Sunday night on Sugar Island, 21 miles out in Lake Erie.

The bag was piloted by Dr. Reinhold Halben and Hugo Kaulen, Jr.

There is no telegraph communication between the island and the main land, so the aeronauts could not report their position. Summer residents went to their assistance as both men were nearly exhausted from a battle with the balky balloon and adverse wind currents.

The balloonists remained overnight at the cottage of G. L. Jeager of the Jaeger Machine Co., Columbus.

The balloon Helvita, Swiss entry in the Gordon-Bennett cup race, landed 16 miles north of Statesville, North Carolina, at 6:15 p. m.

NELSON T. JOHNSON

Nelson T. Johnson, who has been appointed assistant secretary of state. He has been serving as chief of the far eastern division of the department.

BARN STRUCK BY LIGHTNING AND CONSUMED

During the heavy rainstorm last Saturday night the barn of Sherman Hurley near Fox, was struck by lightning. The building, 50 by 60 feet, four sets of harness and between seven and eight tons of hay were consumed. It was a new building, well constructed and was roofed with galvanized iron. Fortunately for Mr. Hurley the wind was in an opposite direction and that was the only thing that saved his home.

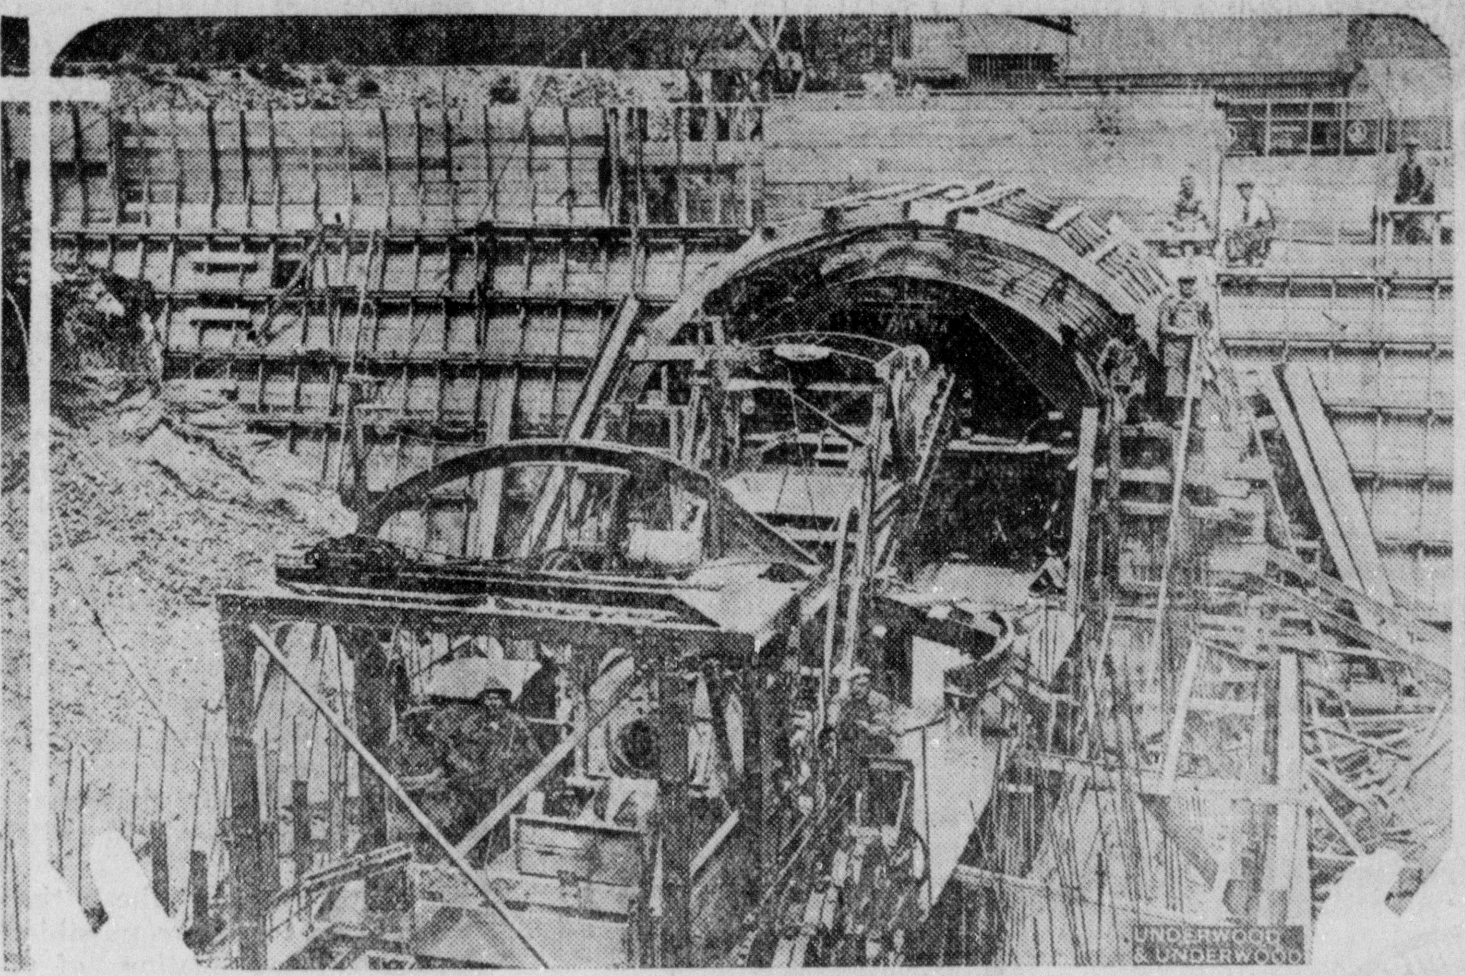

The barn and contents was partially covered by insurance.

BIRTHS

To Mr. and Mrs. Wilbur Cunningham, Jackson township, Sunday, September 11, 1927, a daughter.

To Mr. and Mrs. Elmer Palm, 810 South Scioto street, Sunday, September 11, 1927, a daughter, Betty Jane.

Building Longest Tunnel in America

The great bore of the Great Northern railroad through the Cascade mountains, between Berne and Scenic, Wash., a distance of eight miles, is being built. It will cost \$10,000,000, and shortens the distance by eight miles.

HAPPENINGS IN OUR STATE

Taken Direct From Wires By Correspondents of the United States Press Association.

Columbus—Common pleas judges thruout Ohio were asked today by Chief Justice Carrington T. Marshall, of the state supreme court, to expedite the trial of all criminal cases arising from indictments returned by the September grand juries, as a means of discouraging crime in the various counties.

Cleveland—Lawrence Lupo, Cleveland prize fight promoter shot Friday night as he sat in his auto in front of his home was recovering Monday, physicians said. Lupo's left eye was shot out and his nose nearly blown off.

Dayton—O. L. Cunningham, county farm agent reports that the average yield in crops in Montgomery county this year will be from 15 to 50 per cent less than those of 1926. Corn is about 65 per cent less and two weeks or more late. Oats dropped from 20 to 45 per cent in some localities.

Cleveland—At liberty since August 12, from London prison farm, where he escaped, Gilbert Dawson, 28 of Akron, Ohio, was caught here Monday by Cleveland police. Police said Dawson had attempted to visit his wife who was staying in Cleveland.

Columbus—Silvie Testaguzze, 5, died yesterday of infantile paralysis with which he was stricken three days ago. The tot had been isolated in a hospital since discovery of symptoms of the disease. Besides his parents the lad is survived by one little brother, Vite.

FOR RENT.

MOVED TO COLUMBUS.

Dr. and Mrs. F. E. Ginder and daughter, Miss Violet, have moved from Darbyville to 463 East Tompkins street, Columbus. Dr. Ginder practiced his profession in Darbyville for 23 years and has been quite successful. He has opened an office at 365½ Hudson theater building, East Hudson street, Columbus, and his many friends in this county are wishing him abundant success in his larger field.

NEWS ABOUT COURT HOUSE

General Happenings Taken From the Records of the Various County Offices

Sentenced to Jail

Clarence Haddox, a married man charged with contributing to the delinquency of Louise Rutter, a girl under the age of consent, being 14 years old was found guilty in probate court and was sentenced by Judge Adkins to four months in the county jail.

Judgments by Confession.

I. F. Snyder has secured a judgment by confession against Hugh Stevenson, Ella Stevenson, N. C. Stevenson and C. G. Campbell for \$530.45 at 8 per cent interest from September 10, 1927.

I. F. Snyder has secured judgment against Fred C. Betts, Gertrude Betts and George H. Adkins for \$275 with interest at 8 per cent from September 10, 1927.

Fined For Possession.

Thomas Valentine, who was placed under arrest last week and later released on a bond of \$500 appeared in court Saturday plead guilty and was given a fine of \$100 and costs which he paid and was released.

Marriage Licenses.

Fred Marlock, 26 truck driver, Columbus, and Clara Shaw, 34, Circleville.

Jesse Calvert, 20, packer, Salt-creek township and Rose Steebton, 18, Washington township. Rev. W. L. Greene.

George Shannan, 21, riveter, Columbus, and Mildred Ruh, East Ringgold. Rev. Gorsuch.

SPIDER BITES FINGER

Miss Florence Garner, who is employed at the Charles Garner grocery corner Pickaway and Walnut street, was bitten on the right hand by a tarantula while handling some bananas Sunday. The sting of the southern visitor made the member swell rapidly. The wound was cauterized by Dr. D. V. Courtright. The sting of this insect is quite venomous in its native home, but the temperate climate of Ohio, reduces the strength of its poison.

TO COLLEGE.

Mr. and Mrs. George G. Adkins and daughter, Miss Evelyn, left Monday morning for Bristol, Virginia, where Miss Evelyn will be a student in Sullins college. They are making the trip by motor and will reach Lexington, Kentucky, Monday evening and Bristol the following evening.

TROUBLE AT DARBYVILLE.

Vircil Slagle got on a high lonesome at Darbyville Saturday night. By the time Marshal Cyrus Hinton learned of the drunken man's condition, and went to place him under arrest he could not be found.

Marshal Hinton suspected the man had been secreted and placed Ernest Brigner under arrest charging him with interfering with an officer, while making an arrest.

The sheriff's department brought Mr. Brigner to this city and he appeared before Justice Friece. He was found guilty and was fined \$5 and costs which he paid and was released.

JAY P. MOFFAT

Jay Pierrepoint Moffat, who has been the secretary of the newly established American legation in Canada, has been appointed first secretary of Uncle Sam's legation in Bern, Switzerland. Mr. Moffat was at one time ceremonial officer at the White House. He recently married Lilla Grew, daughter of the ambassador to Turkey.

PEACEFUL BEAR PEQUOT INDIAN THE HEADLINER

The Ohio History Day association will hold its annual meeting at Logan Elm park on Sunday, October 2. The principal attraction will be Koo-tot-pah-he-too, meaning "Peaceful Bear," a young Pequot Indian chief from Granville, Ohio, where he is attending Denison university. His repertoire consists of native songs and an address on The Indian Past, Present and Future.

Tho the world may owe every man a living, only the persistent collector gets it.

AUTOS COLLIDE ON DARBYVILLE PIKE SATURDAY

One Woman Dies, Another is Dangerously Cut Near Her Jugular Vein.

In an automobile collision Saturday afternoon on the Darbyville pike near the Crites-Jones farm line, one woman was killed and another so badly cut across the throat, that it was feared at the time her jugular vein had been severed.

The Dead.

Ruth Eleanor Phillips, 25, wife of Charles W. Phillips, of Logan.

The Injured.

Charles W. Phillips, back wrenched and bruised; Mrs. Albert Bethards cut on both sides of her throat near the jugular vein and an abrasion on her forehead just above her eye; Albert Bethards, right leg bruised, cuts on wrist and arm.

The dead woman's injuries were a fractured skull, right leg broken near hip, joint, and injured internally. She and her husband were taken in Albaugh ambulance to the Home and Hospital, where Dr. Courtright and Dr. Evans gave them surgical attention. Before passing away the injured woman is said to have made the remark that why are people so careless.

The Bethards were brought in by passing autoists and were taken to the office of Dr. Howard Jones where Doctors Lloyd Jonnes and Jackson gave them attention. Mr. and Mrs. Bethards accompanied by their uncle, John Carlisle, of Oklahoma, returned to their home in Derby, Saturday afternoon about 3 o'clock.

Mr. Charles W. Phillips Monday accompanied the body of his wife to Huntington, West Virginia, for burial.

Total disregard of traffic rules of the road seems to have been the cause of the collision. The Darbyville pike is as fine a stretch of roadway as there is in the county and accidents such as occurred last Saturday and the loss of life that followed seems inexplicable. Someone erred as the road is wide enough, and if autoists are careful, accidents, and especially collisions will be avoided. In these days of speed, caution continued on page four.

CLUB PROGRAM WILL BE GIVEN THIS EVENING

The Boys' and Girls' club achievement program will be presented at the Jackson township centralized school Monday evening, September 12 at 8 o'clock.

The program will be put on by the club in cooperation with the Farm bureau.

Miss Mary McKenzie will discuss "Feeding and Flock Management for Winter Eggs." The club pageant, "The Spirit of the Home" will be put on. The program will be in charge of the club leaders, Miss Mary Shortridge and Mr. Newell Stevenson.

SOCIAL CALENDAR

The bans of matrimony were published for the first time Sunday for Miss Elizabeth Voll, of this city, and Mr. G. A. Snider of Columbus. The marriage ceremony will take place at St. Joseph's church, this city, Tuesday morning, September 27.

The small boy makes a home run when he hears his mother calling him.

Their Turn to Smile

New England farmers who used to bear the brunt of all the jokes about lightning rods, could certainly get a kick out of those thousand-dollar contraptions surrounding the oil tank

We are prepared to do your cleaning on short notice. We have all the equipment necessary and 20 years experience. Call **BARNHILL.**

First Street Railways

Boston's first street railway was opened in 1850, and Philadelphia inaugurated a similar service the following year. The first street railway in England was at Birkenhead in 1860. In the same year a line was laid in Liverpool, and London's first "train" dates from 1869. The first street railway in France was from St. Cloud to Paris and was constructed in 1856.

THE FIRST NATIONAL BANK

CIRCLEVILLE, OHIO

"The Bank That Makes You Feel At Home."

Fall Fashions in Paris Limelight

Few Changes Proposed by
Designers; Crepes, Vel-
vets Are Favorites.

In these the most important days of the fashion year Paris is a scene of frantic excitement, for the doors of those mysterious regions where the mode is made are swinging wide and we learn at last the aspect of the autumn season.

In the confusion, observes a Paris fashion correspondent in the Philadelphia Ledger, there is great difference of opinion as to the general effect, some houses showing a new silhouette and slightly higher waistline, others avowing that there is and will be no change in line, and, as in the case of one prominent designer, only changing the plan of the design inside the silhouette.

The effect of the latter collection may be summarized as sophisticated simplicity, with a decidedly modern art feeling in decoration, quantities of applique and incrustations in very modern flower designs being used.

Diagonal and converging lines, developed by tucks, seams, plaits and applique, carry out his ideas of symmetrical design. Many models consist of any number of sections cleverly combined, the lines converging just above the hip line on one side. The waistline remains for the most part low, but varies slightly. There are quantities of belts in his collection, used on dresses for all times of day.

The favorite daytime materials are crepes, velvets, both plain and printed in small designs, and satins with the dull and shiny sides combined. For evening there is much silk lace of small design, chiffon and georgette.

The general length of the skirt remains unchanged but varies according to the type of gown. Great attention is paid to neck lines, the square being particularly favored, and many evening gowns have a deep pointed décolletage in back.

Sleeves are for the most part long and tight, except those of evening wraps, which have huge novel sleeves with cuffs of fur.

The colors of the collection above mentioned include new and hitherto unimagined greens, blues and blue-greens verging on peacock. There is some rose and a new light red very like pomegranate. Pale maize is a new note for evening. For sports wear, there are new neutral-toned ensembles, the sweater blouses blocked in a cubist pattern looking like solid wool embroidery in three tones, the top coats fur-collared.

All shades of gray are in evidence and frequently several combine in one dress or ensemble, and gray also combines with black. There is much black, both for afternoon and evening, with touches of diamond embroidery or a single jewel.

Afternoon ensembles often consist of a velvet coat cut on straight lines and collared with lynx or fox and a satin or crepe dress in a lighter shade of the same color.

Many houses feature drapery, usually on the side in a puff or chou at the hip line, as in the frocks of Cyber. Nearly every house shows more flare in skirts, achieved by panels, godets, circular sections, fan-plaiting and tiers.

The uneven hemline is also fairly prevalent. Another shows models with circular flares much larger on one side than on the other. Still another favors the higher waist, approaching the normal.

Fall and Winter Coat, Kashmir Cloth in Gray

Showing a charming fall and winter coat of kashmir cloth in gray, with shawl collar and cuffs of gray dyed kid fox fur.

Neutral Colors Favored for Golfing in Paris

Love of golf does not exceed love of clothes with French women.

This season French women golfers make neutral colors the basis of their costumes. A visit to St. Cloud, St. Germain or any fashionable course near Paris shows a preponderance of beige and gray. An occasional bright sweater lights up the links, but hats, stockings and skirts are in neutral shades as a rule.

WONDERFUL INVENTION WILL BE EXHIBITED

At the Radio World's Fair In
Madison Square Garden
New York City.

Devices so delicate and yet so powerful in their potentialities as to stagger the imagination are to be actually operated, for the first time in public, at the Radio World's Fair, in Madison Square Garden, New York City, Sept. 19 to 24, inclusive.

A demonstration of a fire alarm device that literally "sees" and responds to the faintest trace of smoke is a part of the display to be exhibited by the Westinghouse Electric and Manufacturing Company in the theatre of wonders at the Radio World's Fair.

The agency that operates the alarm is a combination of a photo-electric cell and what is practically a standard radio tube—an achievement of Dr. V. K. Zworykin, physicist on the research staff of the Westinghouse Company. The tube is so responsive to light changes that smoke, as faint as a whiff from a cigarette, will be utilized to turn on a red light. When the smoke is conducted between an automobile headlight and the Zworykin device, the consequent diminution of light will lower the electrical current, and this reduction in the activity of the electrons will start a relay that will switch on the red light.

The Zworykin tube is the first invention to make possible the practical application of photo-electric effects. The principle had been a scientific curiosity until the Westinghouse scientists, after nearly two years of work, in the East Pittsburgh laboratories of the company, achieved his goal—the conversion of light rays into mechanical power.

In addition to acting as a fire detector, the device has a number of other practical applications. One of these is the automatic control of light houses in untended stretches of the sea.

With the Zworykin device, such lights may be turned on and off simply by the agencies of light and shadow.

SAGE SAYINGS

Great labor is wasted unless wisely applied.
Mother tongues frequently run to baby talk.
You can't do the right thing the wrong way.
A good laugh is sunshine in a house.
—Thackeray.
Investments, like charity, should begin at home.
Inefficiency is the soil that does not grow success.
Scold a majority and the majority generally laughs.
A baby understands a great deal more than you think.
The longest life doesn't amount to much compared to time.
A man who loves lots of company goes to all the conventions.
Civilization is also the ability to escape the plagues of civilization.
Love thy neighbor as thyself—but know thy neighbor as thou dost thyself.
All men may be made of dust, but some men have a lot more dust than others.
Pity the mortal who has ceased to chase at least one rainbow.—Forbes Magazine.
It sometimes happens that a girl may get rid of a persistent suitor by marrying him.
Millions of people can't be impressed with the idea that they ought to "improve their souls."
A woman likes to have people say that she is young looking and is a member of an old family.
Longer a man lives, the more he is convinced that truth lies deeper than at the bottom of a well.

First Envelopes

Envelopes came into use in the United States and in England between 1840 and 1850. The first practical machine for making envelopes was patented in England in 1844 and the first American patent was taken out in 1849.

A real partnership exists between a woman and her Maytag—a bond that grows stronger day by day.

A week's washing done in an hour. All garments washed clean without hand-rubbing—even cuffs and collars; a heat-retaining cast-aluminum tub, self-emptying and with adjustable legs; an automatic wringer; these and other features have brought to the Maytag a huge army of satisfied owners. A Million women—wedded to the Maytag—give ample testimony to the genuine worth of this washer.

Says Oil Prevents Rain
That lack of rain is caused by oil film spread on the surface of oceans by ships that burn oil fuel, is the theory advanced by L. A. Ramdas, a weather expert at Karachi, India. He says that this film, while less than a millionth of an inch thick, may be sufficient to retard the evaporation of ocean water, which is the chief source of rain.

TRADE BETWEEN INDIANS SHOWN

Relics Reveal Barter by Tribes Separated by Geographical Barriers.

Baltimore, Md.—That trade relations existed between the prehistoric Indian groups in America, though they were separated by geographical barriers and tribal enmities, is further evidenced in a collection of archeological objects from the Columbia river valley, in the state of Washington, obtained by the Smithsonian institution. The relics were gathered and are now being classified by Herbert W. Krieger, curator of ethnology at the National museum, under the Smithsonian.

Among the artifacts found by Mr. Krieger at the ancestral homes deserted by the Columbia river Indians more than 100 years ago, are catlinite pipes from Minnesota and pipes from the Pueblo region in the Southwest; abalone shell charms from Alaska; halotis shells from southern California, and dentalium beads from the Pacific coast.

Establish Link.

The type of subterranean house is identical with that to be found in Alaska, the Aleutian islands, and Siberia, it is said. Yet the Columbia river Indians had no means of transportation to take them over the mountains and they were held to the river for their food supply. As a tribe they were nomigratory, but individuals made casual trips for trading and hunting purposes.

Mr. Krieger's study, it is announced, has established the link which has been missing to show the continuity of culture among the early inhabitants of America from British Columbia to the Pueblo tribes of the Southwest. Customs sifted through from one community to another, much as the Indians themselves spread, no doubt, it is said, from Asiatic ancestors who drifted in ages ago.

That the Columbia river Indians established themselves in the valley before the time of the domestication of the pig, sheep and horse in Asia, before the invention of the wheel or the cultivation of cereals, seems evident, it is said, from the reconstruction of their civilization.

Master Stone Workers.

The Columbia river valley was thickly settled, possibly the most populous Indian center of early times, according to Mr. Krieger. For 500 miles, from the Dalles in Oregon to the Canadian border, the campsites and burial grounds line the river banks.

These Indians were masters of the stone worker's art, according to the Smithsonian collection. They cultivated only tobacco and got their food from the river and from roots. The dead were cremated with their possessions, or buried in cemeteries on islands in the river.

Samples of the picture writing practiced by the Indians abound. The markings are about one-half inch deep, usually made in columns of basalt.

Animals, such as sheep, goats, deer, and elk, were commonly represented; also the human figure; conventional designs, such as the rising sun, and mnemonic or memory writing, consisting of arbitrary signs understood by the members of the tribe. The writing was apparently more a means of artistic expression than a method for conveying thought, according to Mr. Krieger.

Find Horse Picture.

Only one picture of a horse has been found. It was the introduction of the horse about 1750 which broke up this old civilization in the Columbia river valley, for with the horse the group became mobile. It is an interesting fact, says the announcement, that the horse in North America spread from a nucleus formed by a few which escaped from Coronado's troops in 1514.

Members of the Columbia River Archeological society and others interested in antiquities have done much, it is said, to preserve objects found in the old graves, villages, and fishing grounds. Large collections are in the hands of officials of the Great Northern railroad and residents of Walla Walla, Wenatchee, Quincy, and Seattle, Wash.

First Advertisement in London Paper in 1695

London.—What is believed to be the first newspaper advertisement has been discovered in the files of a London newspaper. It is exhibited at the advertising exhibition and convention held in London during July.

The ad is from a newspaper called "A Collection for Improvement of Husbandry and Trade," published in London, December 13, 1695. It reads as follows:

"A Commander of a very good merchant ship wants an apprentice that bath his Pen well, and understands Arithmetick to assist him in the keeping of Books and doing of Business, and hath Friends who will be bound for his true and faithful Service during his Apprenticeship."

Refers to Dress

New York.—Green charrouse is to be popular in the spring. It's a shade for milady's clothes. The forecast is made by Miss Margaret H. Rorke, textile color expert, just back from Paris.

BIG BUSINESS

New York.—Carrying out its decision announced two months ago to dispose of its workers' co-operative grocery stores, the Endicott-Johnson Corp., which employs 17,000 people in its shoe factories, New York, September 1 sold all its store to the American Stores Company at Philadelphia, one of the leading chain store groups of the country.

"The Endicott-Johnson stores were originally started at the close of the war to meet the sudden rise of living costs, and since this condition has now been adjusted, there is no further reason for their continuing under our management," George F. Johnson President, stated in announcing the sale of the Endicott-Johnson workers.

The purchase of the Endicott-Johnson stores is the advent into New York State of the American Stores Company, which operates 2,100 grocery and meat shops throughout the middle Atlantic states.

Liquid Lenses Perfected

As substitutes for ordinary lenses, glass shells filled with liquid have been devised by a French inventor, who says that by his process an astronomical lens equal to the usual ground type that would cost \$100,000 and require years to complete, may be made in a few weeks for \$1,000. The fluid substance is inclosed between two hard surfaces, and the new lenses may be used in opera glasses, cameras and microscopes.

The Wrath to Come

President Guth of Goucher college told at a tea in Baltimore an examination story with a moral.

"A student," he said, "took it easy through the year, and when examination time came he failed in all seven of his examinations."

"Poor father!" he thought, "and he so proud of me!"

"So the student hurried to the telegraph office and telegraphed to his sister:

"Failed in all seven examinations. Prepare poor father."

"His sister telegraphed back:

"Father prepared. Prepare yourself."

STREAM POLLUTION

Residents of Circleville and Pickaway county may finally be relieved of almost intolerable conditions caused by the pollution of the Scioto river by dumping into the stream of the sewage of the city of Columbus.

At one time this summer our people were obliged to boil drinking water or face an epidemic of typhoid fever with its usual death toll. A later analysis of the water showed that it was satisfactory. This "satisfactory" condition was not brought about by any improvement wrought in the filtration system of Columbus, but Providence graciously took care of us by sending copious rains throughout the heated season. Another year we may not be so fortunate. It is not always wise to depend on Providence for results we may ourselves bring about.

Circleville is twenty-five miles south of the Columbus filtration plant, and the situation here is almost unbearable. How much worse it is miles nearer the source of contamination can easily be imagined, but is not so easily described.

We have always held to the belief that under its police powers, the state board of health can do almost anything to preserve the life of the citizens.

However, as results are the only things in which our people are vitally interested, there is no disposition to quarrel about methods. In fact, the residents of the affected territory would much prefer to see this nuisance to life and health removed by voluntary agreement by those who are responsible for the condition, than to have it brought about in any other way.

Recent events leads us strongly to hope that a better day is in sight, and this hope is born of facts outlined in the Columbus Citizen of last Friday, and is there stated so much better than we could hope to do that we quote:

"The city of Columbus is constructing a new intercepting sewer on the east side of the Olentangy river as a step to relieving the pollution of the Scioto river, John H. Gregory, consulting engineer of Columbus, revealed at a conference of the Public Health Conference with Dr. John E. Monger, state director of health, Friday afternoon.

"With the approval of the Public Health Council, Director Monger, issued two orders:

"1: Columbus must eliminate pollution of the Scioto river within two years.

"2: Columbus and Bexley must eliminate pollution of Alum creek within two years.

"Relief from pollution is necessary, F. H. Waring, chief engineer of the state health department, declared at the conference.

"The council adopted a resolution declaring that the pollution is a menace to health.

"Chairman Postle, who was present at the conference, declared he would pass the information on to council.

"Bexley will remodel its separate sewage disposal plant at once in accordance with the order of the Public Health Council, Harley E. Peters, Bexley village attorney, told Director Monger. He admitted the charge of the state inspector that the Bexley disposal plant was overgrown with weeds. This was due, he said, to the fact that the street commissioner who has charge, has too many other duties. He said Bexley council would provide more help at once."

Monarch's Long Reign

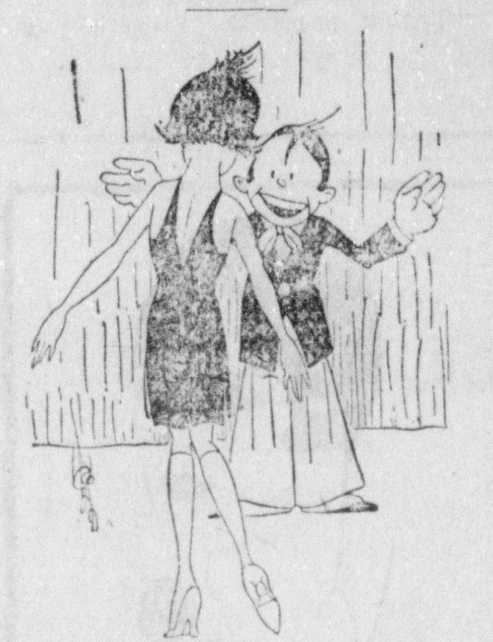

Louis XIV, king of France, ruled so long that he outlived his son and grandson and was succeeded by his great-grandson. He reigned for 75 years from his coronation at the age of five until his death in 1715.—Liberty.

TESTING THEM

"Tell the janitor to put up notices that no book agents are to be admitted to the building," said the publisher.

"But you have just advertised for agents to sell our new work," protested the secretary.

"Of course I want to try the applicants out. If a man could be stopped by a little thing like that, what good would he be to us?"

NOT PROOF

She—I answered her in the negative, didn't I?

He—But, the negative is not the proof.

Hard Luck

De Mar will never run again, for which he may be pardoned; An amateur he will remain. Because his arteries hardened.

Camouflage

"Can you recite 'The Star-Spangled Banner'?"

"Not all of it," admitted Senator Sorghum; "nor can I repeat all of the Declaration of Independence. But I always send up fireworks on the Fourth of July and am comforted to know that any oratorical efforts on my part to interrupt them would not be appreciated."—Washington Star

Ahead of Time

William Lyon Phelps, literary critic, said at a New Haven tea:

"I was talking to a novelist the other day at a luncheon. He pushed back his mane of hair and murmured wearily:

"I have had a host of imitators."

"Yes," said a poet, "especially be forehand."

Reducing

"Is your physician helping you to reduce?"

"I think so," answered Miss Cayenne. "I fancy both father and myself have grown thinner worrying over his bills."—Washington Star.

THE LONG ARM

And George put his arm around me at least a half dozen times."

"When did George develop octopus tentacles, my dear?"

Dull Life

Jack Rolf would watch no golf. His wife would watch no baseball. And so betwixt the two of them They had no sport at all.

The Other Half

The grocer said—I've got just one peck of the finest peas, madam, at ready shelled.

Customer—I'll take half a peck.

The grocer divided the peck of peas.

Customer—Is that half?

Grocer—Yes.

Customer—I'll take the other half.—Tit-Bits, London.

Power of the Press

"Do you stand back of every state ment you make in your newspaper?" asked the timid man.

"Why-er-yes," answered the country editor.

"Then," said the little man, holding up a notice of his death. "I wish you would help me collect my life insurance."

Always the Case

Mrs. Brewer—My husband is always busy at something when he is in the house.

Mrs. Stewer—Oh, my husband is always busy when he is in the house—making work for me, you know.

Not Her Name

Telephone Operator—Will you give our lady, please?

Old Lady—B. P.

Operator—B for beer?

Old Lady (Indignantly)—No; B for Bertha.

Cog Missing

Bore—Yes, I don't know how it is but I feel thoroughly wound up to night.

Hostess—How strange! And yet you don't seem to go.

AUTOS COLLIDE

ON DARBYVILLE

PIKE SATURDAY

(continued from page one)

would permit a person to live longer.

The Bethards drove a Buick sedan and in the machine were Mr. Bethard and wife and an uncle, John Carlisle, of Oklahoma. They were returning home to Derby.

The Phillips car was a Dodge sedan. Mr. and Mrs. Phillips were accompanied by her nephew, Clarence Phillips and were returning home to Logan. The boy was not injured. His father was killed in an auto accident a year ago and his uncle and aunt, Mr. and Mrs. Phillips were returning from the Boys' Home at Terre Haute, Indiana, and were taking the lad whom they had adopted to their home intending to rear him.

The Phillips car was struck squarely in the center, on the side and Mrs. Phillips received the full force of the impact.

Ruth Eleanor Phillips was born at Terre Haute, Indiana, and was a daughter of Willis and Ada Kissner Ryan. She was married to Charles W. Phillips at Lima March 30, 1920, and is survived by her husband, her parents, two sisters and two brothers. They are Mrs. Mabel Drake, of Fairbanks, Indiana; Mrs. Ella May Staughbaugh, of Cleveland; Rolly Ryan, of Toledo; and Charles Ryan, of Terra Haute, Indiana.

The remains were taken Monday by the Albaugh company to Huntington, West Virginia, to the home of William Phillips.

Funeral services Wednesday afternoon at 2 o'clock conducted by Rev. Baird, of the Highland Methodist Episcopal church. Interment in Ridge Lawn cemetery, Huntington.

Mr. Phillips is the Logan representative of the National Life and Accident company of Huntington.

Canadian Fisheries

The fisheries of Canada yield about \$44,500,000 a year. British Columbia leads in production with almost half of the total. This is chiefly due to the large catch of salmon.

Doesn't Believe in Spooks

Louise Austen, "daughter of the warden of the tower of London," is a brave girl. She defied the superstition of the headless ghost haunting the chapel royal in the tower and had her wedding there, close to the graves of Ann Boleyn and other victims of the executioner's ax. The bride said she loved to muse in the chapel in her childhood and was more fond of it than of any place she knew.—Brooklyn Citizen.

Economical City Fathers

The city fathers of Jacksonville, Fla., successfully tried a new way of providing music for the frequenters of the city's ten larger parks. One outstanding musical organization was engaged to play in a studio, and the music then was broadcast through batteries of loud speakers in the parks in all parts of the city.

Hens Out of Work

Thousands of hens have been thrown out of work as mothers in California, according to Farm and Fireside, which reports the biggest hatchery known has been found in Petaluma, Calif., where a single setting requires 1,800,000 eggs.

Proverbs Gather Moss

The Anti-Proverb league pridefully points out that Lindbergh couldn't have had any success if he had followed the familiar saw about keeping one's feet on the ground.—Farm and Fireside.

CHILD KING PREFERS

"MICKY" TO MAJESTY

He'll Make a Good Fireman, Marie Decides.

Sinaia, Rumania.—King Michael I. Rumania's five-year-old sovereign, dashed down the concrete walk of the royal summer palace here a couple of days ago in his red-painted, miniature American automobile, almost bowling over Dowager Queen Marie as he went. Ahead of him raced his favorite dog, Mumbo. They imagined themselves going to a fire.

"Madcop Micky," as Queen Marie calls her rump, irrepressible grandson, was shrieking, blowing a whistle and ordering even royalty out of his path. Queen Marie, who was taking a stroll in the palace grounds with the little king's mother, Princess Helen, and former King George of Greece, said jocularly:

"Well, if he doesn't make a good king he surely will make a first-class fireman."

Prefers "Micky" to Majesty.

When the correspondent of the Associated Press asked Queen Marie to describe the boy king, she said:

"He hasn't the remotest idea what the events of the last fortnight mean. He can't understand why people make such a fuss over him. He wants to be called 'Micky' and not 'your majesty.'"

"Like all other children, he is intensely fond of fairy tales, and stories of adventure and daring. He exults with joy and triumph when the villain in a legend has his head cut off or when some wicked character is shut up in a dungeon or eaten alive by wolves. He also loves flowers, a trait which I suppose he gets from me. Knowing my love for flowers, he goes to the palace grounds, picks little nosegays and puts them at my bedside in the evening. He also takes delight in swimming, riding his pony and picnicking."

The queen said that the little king always speaks English to his mother and Queen Marie, but Rumanian to others.

Has Few Playmates.

"Micky has been kept very much at home by his mother," said Queen Marie, "and therefore hasn't many

playmates. Helen puts him to bed at 6:30 or 7 p. m. in the evening. He is up again by 6:30 or 7:00 a. m. in the morning. Half an hour later he is out on the lawn, playing with his scooter or other toys.

"His chief characteristics are his unusual intelligence, argumentative nature, obstinacy and mischievousness. His mother is very religious, but Micky dislikes going to church because the services are so long."

The queen said that Michael had not fully realized that his grandfather, Ferdinand, was dead, and the little fellow constantly looked for the toys which the late king was in the habit of giving him daily.

THE "GET-RICH-QUICK EXPRESS"

By W. R. MOREHOUSE
Public Relations Commission, American Bankers Association

SO many millions of people have been defrauded out of their savings that it is the most natural thing for them to assume that the failure of any company in which they have stock is due to dishonest manipulations within the company.

W. R. MOREHOUSE

The facts are that many companies go on the rocks financially due to mismanagement and poor judgment and without any intent on the part of those in charge to defraud the stockholders.

Because men of good moral character organize a company for the purpose of engaging in some business enterprise is no assurance in itself that the business will succeed. Good intentions are one thing and business ability another, and usually unless there is plenty of business ability the business fails.

Before you invest in any new enterprise you should not only satisfy yourself as to the integrity of the managers but you should be certain that they have the experience, the technical knowledge and the ability to make the business a success.

What I am seeking to emphasize is the importance of making a thorough investigation before you draw your savings from the bank and entrust them in the hands of persons who may lose them, not through dishonesty but through poor business judgment.

Too many inexperienced investors rely on hearsay and on information too general to be at all adequate, when it comes to parting with their cash. So I say, make it a rule always to go to the bottom of every investment, and as it costs nothing to consult your banker, or the local Better Business Bureau, or the National Better Business Bureau, New York City, leave no stone unturned in order that you get the facts.

If you find that the organizers are trying to avoid an investigation, take that as a tip for making a most searching investigation. In making investments a hasty investigation, or a superficial investigation is a most dangerous thing. To get the facts about an investment you usually have to dig deep and wide, and no rush investigation permits you to do this. Promoters of the worst type often welcome a hasty investigation, knowing that it does not give the investor sufficient time to get below the beautifully camouflaged surface finish with which they have so adroitly clothed their fake stock.

The road to happiness and contentment lies along the route to safe investment, the road made safe by the slogan, "Investigate Before You Invest."

BETTER FARMING AT LOWER COSTS

By DAN H. OTIS

Director Agricultural Commission, American Bankers Association

PRODUCTIVITY of labor in several industries shows a remarkable increase in output per man since 1914. In the iron and steel industry there has been an increase of 59 per cent; boots and shoes, 6 per cent; leather tanning, 26 per cent; slaughtering and meat packing, 27 per cent; petroleum refining, 83 per cent; paper and pulp, 34 per cent; cement, 61 per cent; automobiles, 172 per cent; rubber tires, 211 per cent. These lowering costs of production have made it possible for industry to face the hazards of over-production.

Industry has laboratories that are lowering production costs. In the agricultural colleges the farmers have their laboratories—experiment stations that are constantly working on problems affecting farmers' interests, and in them many methods have been worked out by which it is possible to increase materially the yield, reduce the cost of production and follow the same business principles that have been followed by industry.

Farm costs may be reduced through improved live stock. If there were only pure-bred live stock on the farms and ranges, we could get along with millions less animals, and that would release millions of acres for other purposes.

The accompanying table shows what each of seven items of live stock is producing; what each of these items could be made to produce by improved methods, and finally what the saving would be in each class. It gives a total national saving of over two billion dollars.

United States Livestock Production

Kind	Number	Production	Per Head	Possible by Improved Methods			Cost per Head	Total Saving
				Per Head	Number Needed	Reduction in Number		
Dairy cows.....	22,290,000	9,198,305,635 gal.	412 gal.	705 gal.	13,017,151	9,272,849	\$90.00	\$834,553,710
Beef.....	9,833,000 lbs.	4,935,000,000 lbs.	501 lbs.	1 yr. 200 lbs. 2 yr. 800 lbs. 3 yr. 1000 lbs.	9,833,000 6,168,750 4,935,000	3,664,250 4,918,000	75.00	276,318,750
Mutton and lamb.....	12,001,000	467,000,000 lbs.	38.8 lbs.	50 lbs.	9,340,000	2,660,000	8.00	57,616,000
Sheep.....	35,690,150	227,105,177 lbs.	6.38 lbs.	8 lbs.	28,388,147	7,302,012	8.00	57,616,000
Pork.....	43,043,000	5,860,000,000 lbs.	136 lbs.	6 mo. 150 lbs. 9 mo. 225 lbs.	39,066,000 26,044,444	4,974,000 16,998,556	37.50	637,445,830
Brood sows.....	9,170,000	9,210,000,000 lbs.	1000 lbs.	1500 lbs. (one litter)	6,140,000	3,030,000	15.00	45,540,000
Chickens.....	409,200,840	1,913,245,129	56 eggs	135 eggs	170,066,237	239,134,603	2.25	538,255,368
Total.....								\$2,389,729,702

*Slaughtered and inspected. †Dressed weight.

From this table it will be noticed that, if we could obtain a reasonable average production per head, then the number of milch cows could be reduced from 22,000,000 to 13,000,000, or a reduction of 9,000,000, and still maintain the present supply of dairy products. This would involve increasing the production per cow from 3,549 pounds of milk to 6,077 pounds, an increase easily possible through good selection, breeding and feeding.

Beef animals vary in age all the way from one to three years. The present number of animals slaughtered and inspected would be sufficient under improved methods to produce the present amount of beef, and

mutton and lamb could be supplied with 2,661,000 less animals, and it is possible to furnish our present supply of wool and reduce the number of sheep by over 7,000,000.

Our pork products are now produced from swine that average 133 pounds dressed weight. Under improved methods we ought to get pigs that would produce 150 pounds dressed weight at 6 months or 225 pounds at 9 months. At the latter age it would be possible to maintain the present supply of slaughtered and inspected pork and cut down nearly 17,000,000 on the number of hogs to produce it. Similar analyses apply to the other items listed in the table.

PERSONALS

Isaac M. Young was a business visitor in Columbus today.

Edward Shanton was a business visitor in Columbus today.

Lewis Drake, of New Holland, was a business visitor in Columbus Monday.

T. F. Solt, of Detroit, Michigan, is visiting his brother, William Solt, near Ashville.

Mr. William Crissinger spent Sunday with Mr. and Mrs. S. W. Klinger and family at Chillicothe.

Philip Carter, son of Mr. and Mrs. G. E. Carter left Friday for Apex, North Carolina, where he will attend school.

Miss Florence McElfresh, of Columbus, spent the weekend with her parents, Rev. and Mrs. Franklin McElfresh.

Mr. and Mrs. Thad Brown, of Columbus, were Sunday guests of Mr. and Mrs. E. S. Thacher, of Jackson township.

Mr. and Mrs. Leland Gott of Elyria are guests of her parents, Mr. and Mrs. Louis Schneider, of North Court street.

Mr. and Mrs. Collis A. Young, of Lima spent Sunday with her parents Mr. and Mrs. Adam Aldenderfer, of East Main street.

Guy Nickerson, of Tampa, Florida, who has been the guest of his brother Glenn I. Nickerson and family, left Monday for his home.

Mr. and Mrs. Daniel Hagerbaumer and guests, Mr. and Mrs. William Wertman, of Peoria, Illinois, spent Sunday at Buckeye Lake.

Mr. and Mrs. Charles A. Bell, Mr. and Mrs. Lyman Bell were weekend guests of their brother, Thomas R. Bell and wife, of Youngstown.

John Coakley and Ray Z. Myers, of the county surveyor's office, went to Kenton, Hardin county, to witness a demonstration of the Champion ditching machine.

J. C. Tinkey, of Tarlton, deputy state sealer of weights and measures, went to Chardon Monday to make an address before a meeting of deputy county sealers of weights and measures.

Miss Clara Lindsey has returned to Cuyahoga to resume her duties as teacher in the public schools. Miss Lindsay was recently awarded a 4-year provisional certificate by the state board.

Miss Lillian Arbenz, of Wheeling, West Virginia, fiancée of Harry W. Moeller, is a guest of his mother, Mrs. Elizabeth Moeller and sister, Miss Gretchen Moeller, of South Court street.

Mr. and Mrs. Salem Aldenderfer, of Minden, Michigan and Mr. and Mrs. C. E. Aldenderfer of St. Louis, Missouri, have returned home after a visit with Mr. and Mrs. Aden Aldenderfer and other relatives.

Miss Mabel Dumm, a student at the Office Training School, Columbus, spent the weekend at home.

Lawrence McKenzie, a student at the Office Training School, Columbus spent Sunday at home in Pickaway township.

Mr. and Mrs. Eber Drum, Mr. and Mrs. Charles Delong of Stoutsville, and Mr. and Mrs. Paul Drum and children; David and John, of Lancaster, were dinner guests of Mr. and Mrs. John H. Drum, of North Court street, Sunday.

Mr. and Mrs. Charles Skinner of Detroit, Michigan; William Skinner, of Marion; and Mr. and Mrs. Russell Skinner and daughter, Claudine, of New Lexington, were Sunday guests of Mr. and Mrs. C. G. Skinner of 408 East Mound street.

Mr. and Mrs. Leslie D. May and family, Mr. and Mrs. William Ashbrook, Mr. and Mrs. P. W. Ashbrook and family and Mr. and Mrs. F. C. Blue of Columbus were guests Sunday of Congressman and Mrs. William A. Ashbrook at Johnstown, Ohio.

Chair of Dietetics Wanted

Two contributions of \$50,000 each have been made toward the establishment of a chair of dietetics in the University of London. The gifts are in line with the movement to give the medical profession and others an opportunity of widening their knowledge of food values, and through them, benefiting the public. One contribution was given anonymously by a woman, and the other by a manufacturer of dietetic preparations.

Reaper's Centenary

This is the centenary year of the reaping machine, the early appearance of which, obviating the necessity of large numbers of scythemen, was bitterly resented by agricultural laborers.

Dr. Patrick Bell, a minister of Carmyle, Arbroath, Scotland, invented it while he was a student at St. Andrews' university, and the presbytery of Arbroath has appointed a committee to consider the best method of celebrating the centenary of Bell's invention.

EASY TO TRANSFER THAT POST OFFICE

Postmaster Robert G. Hill of Grand Rapids said at a recent luncheon:

"Our postal service is excellent because excellent salaries are paid and excellent quarters maintained. It wasn't so in the past.

"There's a story about a post office inspector who on his annual visit to Paint Rock found a lot of fault with the Paint Rock postmaster. This gentleman ran the post office in a corner of his general store.

"Well, the inspector gave the Paint Rock postmaster a terrible rigging, and then said, as he got into his buggy to drive on to the next town:

"You'll hear from the chief, Mr. Scraggs, when I get back to headquarters and report about you."

"This was too much for Scraggs. He stalked into his general store and was back in a couple of minutes with a cigar box that contained some stamps and coppers and a couple of little memorandum books.

"Here," he said, "take yer darn post office and get out."

United States Ahead of World in Reading

Some self-confessed intellectuals question the high plane of the American's taste for reading matter but they cannot deny that the American reads more than the other peoples of the world. Government statistics disclose that there are 20,001 newspapers in the United States and that the country's book business last year was \$130,000,000. The nation consumed 10,000,000 tons of paper last year. In face of these amazing figures none can complain that Americans do not read enough. If we don't all read classical literature all of the time we at least read and that is a healthful sign. A comparison of paper consumption reveals that more paper is required for the United States than for all of the rest of the world and that this country's consumption per capita is more than twice as great as that of the next largest user of paper—Bangor Commercial.

AMUSEMENTS

Richard Dix dug deep down in his pocket and brought up a winner when he decided to make "Man Power" for Paramount. It will arrive at the Met Monday and is by all odds the best picture he has ever appeared in.

Directed by the man who has made some of Bebe Daniels' finest pictures Clarence Badger, adapted by Sam Mintz and Ray Harris from a Byron Morgan story, scenarized by Louise Long, photographed by Ed Cronjager and enacted by a cast which includes Mary Brain and Philip Strange "Man Power" shapes up as tip-top entertainment for men, women and children.

It is clean, fast, likable melodrama and you'll enjoy all of Daredevil Dix' exploits. You'll cheer as Richard gets his broken down auto tractor to move and you'll fall in the slough of despair as it falls him at a crucial moment. You'll laugh when Dix vanquishes his villainous rival for Miss Brain's hand and shouts of encouragement will come again and again as Dix finally gets his old machine to start up a perilous, rain-soaked hill in order to reach an overflowing dam in time to save the valley town below. Here are thrills—lots of them!

"Man Power" has lots of that certain something which has always been associated with Dix dramas—speed! It's full of z-zip and nerve at each turn of the projection machine. Yes, without a doubt "Man Power" is well worth seeing.

AMUSEMENTS TERRY'S UNCLE TOM'S CABIN. A PLAY AND COMPANY THAT WILL LIVE FOREVER.

Harriet Ward Beecher Stowe's famous and much talked of slave play of days before the Civil war, as originally dramatized by G. L. Aitken, will be presented at Circleville for one night performance only Thursday, September 15, by Terry's big company that has been presenting this well known play for the past thirty-three years, under the largest waterproof canvas theater on the road.

The Terry show this season is one that cannot be forgotten from the fact that the performance they gave surpasses any previous attempts, no expense having been spared to make this production the most complete ever presented. The massive scenic and electrical effects used in the play are built upon the largest and most lavish scale ever attempted. The presenting cast comprises the very best dramatic talent that can be secured, and the bands and orchestra are composed of the very best musicians that are to be found in the musical world. Another feature is the pack of genuine Siberian bloodhounds—Terry having the largest and most expensive pack obtainable. The company travels in its own especially constructed cars.

There will be a big band concert at 7 p. m. on the principal streets. 10sept d3.

ridge never conquered and one of the most difficult of all. The famous Matterhorn, at the head of the Zermatt valley in Switzerland mountains to the climber, has on its left flank a ridge that has never yet been conquered and which, according to experienced guides, never will be. This ridge rises steeply from the snow fields to about 13,000 feet and is surmounted by a cliff which rises from there nearly to the real summit, 14,830 feet high.

"Words of Christ"

The word "Agrapha," a name used to describe the documents reporting the perpetuated sayings of Christ, was first used in this connection in 1776 by J. P. Korner. The technical meaning of the word as the title of this book was accepted in literary parlance in 1880. At present the word means "writings giving citations of the actual words of Christ."

TO HOLDERS OF
**SECOND LIBERTY LOAN
4 PER CENT BONDS**

**EXCHANGE OFFERING OF NEW
TREASURY NOTES**

Second Liberty Loan bonds have been called for payment on November 15th next, and no interest will be paid after that date. Notice is given of a new offering of United States Treasury notes, in exchange for Second Liberty Loan bonds. The new notes will be dated September 15, 1927, and will bear interest from that date at the rate of 3 1/2 per cent. The notes will mature in five years but may be called for redemption after three years.

Interest on Second Liberty Loan Converted 4 1/2 per cent bonds surrendered and accepted in exchange will be paid to November 15, 1927. The price of the new issue of notes, is 100 1/2. Holders surrendering Second Liberty Loan Converted 4 1/2 per cent bonds in exchange will receive, at the time of delivery of the new notes, interest on such Second Liberty Loan Converted 4 1/2 per cent bonds from May 15, 1927, to November 15, 1927, less the premium on the new notes issued. Holders of Second Liberty Loan Converted 4 1/2 per cent bonds who desire to take advantage of this opportunity to obtain Treasury notes of the new issue, should arrange with their bank for such exchange at the earliest possible date, as this offer will remain open only for a limited period after September 15th.

Further information may be obtained from banks or trust companies, or from any Federal Reserve Bank.

A. W. MELLON,
Secretary of the Treasury.

Washington, D. C., September 6, 1927.

Relieved His Feelings

"Had a good lecture on Alaska, didn't we, Zeb?" asked one of Mr. Gorton's neighbors, meeting him the next morning. "To sit there by the radio peaceful as pie for two hours hearing him reel off the information was a grand rest for me, beat out with cranberrying as I be."

"It was a good enough talk," admitted Mr. Gorton, grudgingly, "but it didn't rest me any to speak of. Having to sit stock still without a chance to get in a word for two mortal hours, I was pretty well worn out afterward. But I took the lantern out in the woodshed and by the time I'd split up a week's kindling I felt kind of rested and calmed down."—Kansas City Star.

GERMANY'S VIEW

**Stresemann Says Peace Cannot
Come Unless Troops Are
Withdrawn.**

Geneva, Sept. 9. — (UP.)—Foreign Minister Stresemann of Germany addressing the League of Nations assembly today said it would be impossible for the spirit of peace to have its full course so long as German territory was occupied by foreign troops.

The foreign minister announced that Germany would sign the optional clause in the Hague Court Protocol accepting the obligatory jurisdiction of the court in international disputes.

Emphasizing the modern importance of economic and material relations, Stresemann expressed the opinion that the next war would be an economic war.

**POOR OF NEW YORK
IN EVIL CONDITION**

With the general increase of luxurious apartment houses for the wealthy the New York city health department is endeavoring to bring before the public the fact that housing conditions in certain parts of the lower and extreme upper East side have not kept pace with the sanitary progress of the rest of the city. The infant mortality and general mortality rates and the tuberculosis rate of these parts is considerably higher than the rates for the city as a whole. Field nurses from the department have recently completed a house-to-house survey of these districts. The conditions disclosed Louis I. Harris, health commissioner, describes as menacing and intolerable. Bedrooms are crowded and badly ventilated. Many families live in basements. Scattered throughout the sections are factory buildings which the commissioner regards as having a definite influence upon the health of the children. Doctor Harris hopes to arouse the city to the need of remedial measures.

Early Biblical Division

The first division of the Bible into verses was made by Stephens, the printer, in 1551.

Enjoy Your Home

--- All of It ---

This winter many families will LIVE ALL OVER THEIR HOMES—using all the rooms, enjoying the comforts of ALL of their furniture, for they will use the modern Cabinet Heaters.

Others will live in one or two rooms, close up the balance of the house for the winter, all on account of the inefficiency of the old type of heating stove. They will hover around the old stove in an effort to keep warm, while the other folks will be enjoying themselves all over their homes, for the reason that they are using one of our circulating Heaters.

There is no "guess-work" any more about these new heaters doing the work for which they are intended. We have sold them for the past five years AND THEY DO WORK. Ask any of our users—we'll be glad to tell you who they are and where they live.

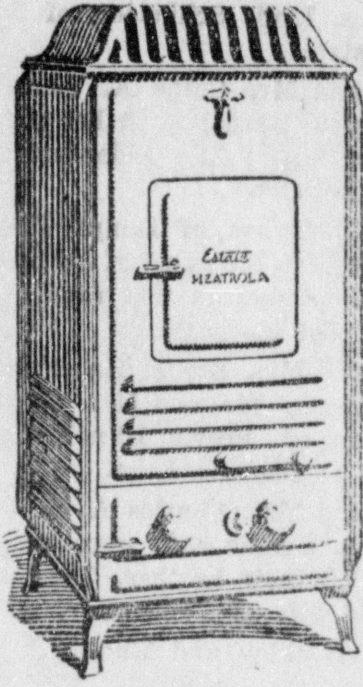

CIRCULATORS

For All Sizes of Pockets—Books—Here They Are

First comes the Old Reliable

Estate HEATROLA

There is only ONE Heatrola—ESTATE builds it

This Heater has been used longer than any other Circulating Heater. We believe it to be the best built and most efficient heater on the market. The Intensi-Fine Air Duct, placed inside of the combustion chamber, doubles the amount of hot air discharged. We have them heating up to eight rooms.

Price \$154.50 (cash)

Then there's the

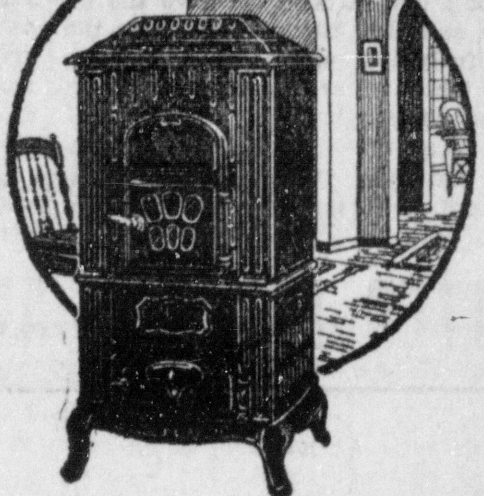

SOLAR PARLOR FURNACE

The outer casing is Porcelain Enamelled, with Grained Mahogany finish. It is one of the largest and most powerful heaters on the market. The manufacturer had the farmer in mind when he built this heater. It has an 18 inch fire-pot, with boiler plate body. It has heating capacity of 12,000 cubic feet, or enough to easily heat six to eight large rooms. It is 54 inches high, and 24 inches square. A beautiful piece of furniture as well as a very efficient heater.

Price is only **\$125.00**

Next in Line Comes

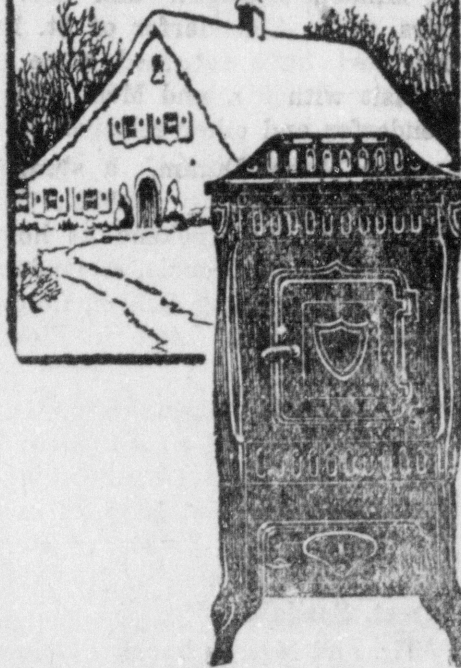

Keeps All YOUR Home Warm

**—THE RADIO—**

It has a heating capacity of 8,000 cubic feet, or enough to heat five to six rooms comfortably. It has a 16 inch fire-pot, and stands 50 inches high, and 22 inches wide. Finished in a beautiful Mahogany finish. This heater sells at **\$90.00**

The Radio, same as above, with the exception that the finish is plain black, with nickled corner pieces, sells at the extremely low price of only \$64.50. Why buy the old fashioned type of round heater when you can buy a parlor furnace for so little?

Heats YOUR Entire Home

A Real Heater for the Money is

THE CABINET

This type is built like a smelting furnace,—with a lining of fire-clay. They have been used under the most trying conditions, heating warehouses, and the results were most satisfactory. We have them in two sizes—16 inch pots with a capacity of 8,000 cubic feet, and 18 inch pots with a capacity of 10,000 cubic feet.— **PRICES—**

16 inch plain black finish \$50.00
16 inch Mahogany finish \$75.00
18 inch plain black finish \$65.00
18 inch Mahogany finish \$85.00

Saves Fuel!

Yes, we still have some Round Heaters Used and New—Florence used—Moore's Air-Tight used—Round Oak used and new—and others. All of them at a price that will interest you. If you are needing a heating stove, it will pay you to visit our Stove Department.

THE BUCKEYE'S reserve and surplus—\$1,700,000—is a guarantee of safety under all conditions.

AUBURN

Breaks Closed-Car 2,000-mile Record

Then during night skidded in rain storm, turned over several times, received body repairs only

Then Finishes 15,000-miles at 62.709 M.P.H.

For more than 30 hours, averaging better than 65 miles an hour, this strictly stock Auburn Sedan had been whirling around the Atlantic City Speedway day and night.

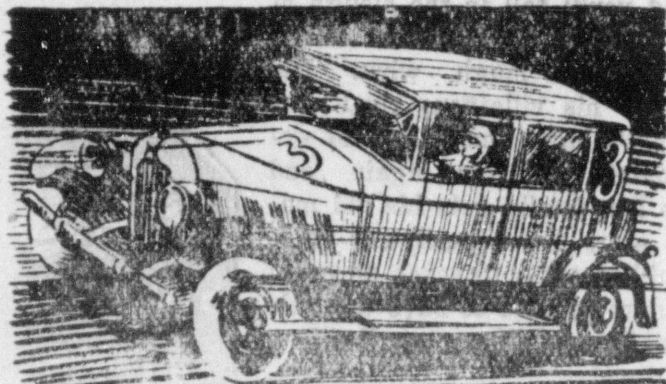

Then came a terrific rain storm. Wet track. At 70 miles per hour the driver skidded, the car crashed.

Radiator and body repairs were made. Seven hours had been lost. But the Sedan went back into the test with the same driver. It caught up with the other two Auburn stock cars and finished the unprecedented distance of 15,000 miles.

After the accident, the car was declared non-stock, as it was no longer complete—exactly as sold, but its time continued to be officially recorded by the A.A.A. The longest, hardest and fastest official test ever given a closed car.

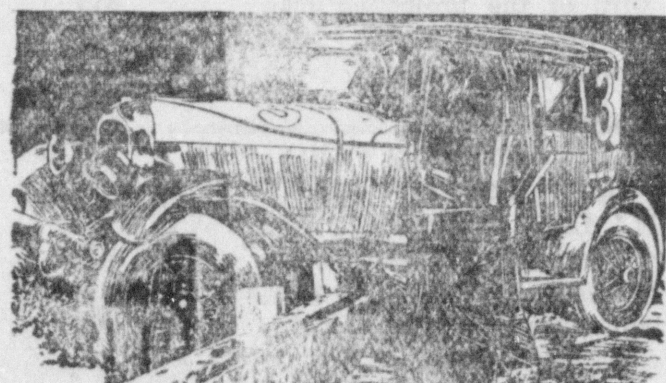

Unheard of as this performance is, it was only an incident in the 42,000 miles of official stock car test Auburn conducted, breaking all records for completely equipped stock cars from 5 to 5,000 miles, and establishing new stock car records from 5,000 to 15,000 miles.

The purpose of this extreme and hitherto unattempted stock car test, was to demonstrate by three times greater proof the supreme leadership of Auburn cars in speed, endurance, durability and efficiency. Your Auburn dealer has exact duplicates of the Auburn cars that made these phenomenal records.

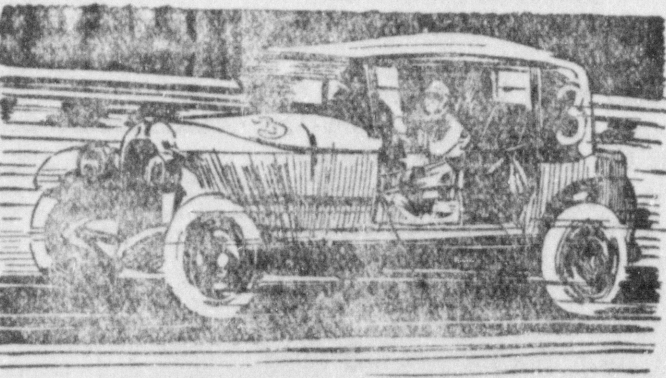

Drawing made from actual photograph

The Auburn Straight Eight Sedan, one of the three fully equipped stock cars in the Atlantic City Speedway endurance test. Here it is shown traveling better than 70 miles an hour after breaking closed-car 2,000 mile record at 65.583 miles per hour.

Drawing made from actual photograph

About the middle of the second night of this continuous run, when the track was wet as a result of a rain storm, the driver skidded. As a result, the car going at high speed skidded. It hit the guard rail and turned over. The sturdy construction of Auburn resisted this smash so well that only body damages resulted. The driver was unhurt.

Drawing made from actual photograph

Here is proof of stamina! After 7 hours for photographs and body repairs, this sedan went back into the endurance test, driven by the same driver, and finished the remainder of the 15,000 miles at an average speed of over 67 miles an hour for the net running time for the entire distance.

6-66 Roadster \$1095; 6-66 Sport Sedan \$1195; 6-66 Sedan \$1295; 8-77 Roadster \$1395;
8-77 Sport Sedan \$1495; 8-77 Sedan \$1695; 8-88 Roadster \$1995; 8-88 Sport Sedan \$2095;
8-88 Sedan \$2195; 8-88 7-Passenger Sedan \$2595. Freight, Tax and Equipment Extra.

"Good Shoes For Less"

OFF FOR SCHOOL

**Circleville Loses Many of Its
 Younger Citizens With the
 Opening of School.**

With the opening of each school year parents are confronted with the thought that for the next nine months they will only have a short visit with their children who leave home to attend school in other cities. This year the number leaving will make quite an impression on the younger social circles and the Holiday vacations are already being planned when they will again be united for a short time.

Miss Gladys Wentworth and Carl Toensmeier leave next Sunday for Wooster College, Wooster, Ohio.

Miss Iola Wentworth will enter the Columbus Art school, where Ralph Smith is also enrolled.

Misses Mary and Effie Anderson will go to Ohio Wesleyan at Delaware.

George Gerhardt goes to Ohio Northern University, Ada.

George William and Gus Groom, John Abernethy and Glenn Vanscoy have enrolled in St. Xavier College, Cincinnati.

To Capital University go Misses Eula Dowden, Eleanor Fitzpatrick, Evelyn Fohl, and Priscilla Trimmer; Carl Leist, Hillard Gehres, Harry Boyer, Irwin Leist, George and Gladden Troutman.

Miss Eloise Hilyard and Carl Mason, enter Ohio University, Athens.

To Muskingum College, New Concord, Ohio, goes Scott and Allen Eagleson, George Vlerbome and Theodore Heiskell.

Miss Lucy Seall will enter Otterbein College, Westerville.

Misses Mary Alice Bales, Ruth Mack, Eleanor Ryan, Louise Mason and Kathryn Marion enter Ohio State University.

Miss Helen Snyder will attend the Morey School of Music in Columbus.

Miss Agnes Newmyer, Columbus School for Girls and Miss Mary Ellen Phillips and Robert Long, Office Training School.

Misses Marion and Helen Hit-

ler and Kathryn May will go to Randolph-Macon College, Lynchburg, Va.

Miss Evelyn Adkins will go to Bristol, Va., to enroll in Sullins Academy. George Hitler and Joseph Adkins will leave shortly for Kenyon College, Gambier, Ohio.

Theodore Goeller will go to the University of Colorado.

Miss Alice Ada May will enter Goucher College, Baltimore, Md., for her second term.

Lemuel Weldon will attend the Yale University Law School.

Renick Caldwell, John Courtright, David May go to Cornell University, Ithaca, N. Y.

Dudley Courtright to Dartmouth College.

Miss Ann Bennett to Birmingham School, Birmingham, Pa.

Misses Mary Crist, and Helen Steele have entered Mt. Carmel Hospital school for nurses, Columbus.

One Bill Later

"I'm sorry I can't pay you today," said the debtor. "My shoemaker's just been here!"

"Yes, I know," said the tailor. "He told me that you hadn't paid him because you expected your tailor. Here's the bill!"—Boston Post.

Judge's Job

Chinese Invented Coins

Hard money or coins were invented by China in 1000 B. C., by Greece in 700 B. C. and by India in 500 B. C.

Kangaroo Outstrips Horse

In a recent race between an Australian race horse and a kangaroo, the latter far outdistanced the horse.

The HOOVER
It BEATS... as it Sweeps as it Cleans

Positive Agitation means a lifelong vacation from drudgery

DIRT never takes a vacation. Day-long, month-long it sifts and filters into the home, to find a favorite hiding place in carpets and rugs.

That means drudgery for the homekeeper, a never-ending and never-won struggle.

But now the homekeeper has a new friend and ally in her fight against dirt, one offering her a life-long vacation from the drudgery of cleaning by old methods.

This new friend and ally is

The Hoover and "Positive Agitation"—enabling faster, easier, deeper cleaning of floor coverings than ever before.

You can enjoy its benefits now not only in the world-famous Model 700 Hoover but in a lower-priced Model 543 Hoover as well.

Dusting Tools, \$12.50
 The Model 700 Hoover, \$75
 The Model 543 Hoover... **\$59.50**

Easy payments if desired. Only \$6.25 down. We will give you a liberal allowance for your old cleaner. Phone us today for a free home demonstration.

THE SUN NEVER SETS ON CHESTERFIELD'S POPULARITY

*Popular in all 4 corners
 of the Earth...*

in Bombay...

and all along "the road to Mandalay"

IN THE newspapers of Bombay, Calcutta and Rangoon Chesterfield advertising speaks of "wrapper-packets" and prices are in rupees... but you may be sure it's the same Chesterfield that you buy in every corner of the U. S. A.

Chesterfield's success in far-off India is typical of its world-wide popularity. Smokers of every race and creed appreciate the natural tobacco taste and fragrance of this famous blend.

Chesterfield

*—such popularity
 must be deserved!*

Their Turn to Smile

New England farmers who used to bear the brunt of all the jokes about lightning rods, could certainly get a kick out of those thousand-dollar contraptions surrounding the oil tank.

We are prepared to do your cleaning on short notice. We have all the equipment necessary and 20 years experience. Call BARNHILL.

First Street Railways

Boston's first street railway was opened in 1850, and Philadelphia inaugurated a similar service the following year. The first street railway in England was at Birkenhead in 1860. In the same year a line was laid in Liverpool, and London's first "train" dates from 1869. The first street railway in France was from St. Cloud to Paris and was constructed in 1856.

Little Things-- but important

Casual spending, for little things, can consume a surprising amount of cash.

And you never realize it's going--until it's spent!

When you're saving money, you get the best idea of how important the little items really are. For small deposits here have enabled many Circleville families and business houses to get a reserve fund that opened new futures of comfort, convenience and happiness.

One dollar will start an account. And our generous 3 per cent interest will add to your savings.

THE FIRST NATIONAL BANK

CIRCLEVILLE, OHIO

"The Bank That Makes You Feel At Home."

Fall Fashions in Paris Limelight

Few Changes Proposed by
Designers; Crepes, Velvets Are Favorites.

In these the most important days of the fashion year Paris is a scene of frantic excitement, for the doors of those mysterious regions where the mode is made are swinging wide and we learn at last the aspect of the autumn season.

In the confusion, observes a Paris fashion correspondent in the Philadelphia Ledger, there is great difference of opinion as to the general effect, some houses showing a new silhouette and slightly higher waistline, others avowing that there is and will be no change in line, and, as in the case of one prominent designer, only changing the plan of the design inside the silhouette.

The effect of the latter collection may be summarized as sophisticated simplicity, with a decidedly modern art feeling in decoration, quantities of applique and incrustations in very modern flower designs being used.

Diagonal and converging lines, developed by tucks, seams, plaits and applique, carry out his ideas of symmetrical design. Many models consist of any number of sections cleverly combined, the lines converging just above the hip line on one side. The waistline remains for the most part low, but varies slightly. There are quantities of belts in his collection, used on dresses for all times of day.

The favorite daytime materials are crepes, velvets, both plain and printed in small designs, and satins with the dull and shiny sides combined. For evening there is much silk lace of small design, chiffon and georgette.

The general length of the skirt remains unchanged but varies according to the type of gown. Great attention is paid to neck lines, the square being particularly favored, and many evening gowns have a deep pointed decolletage in back.

Sleeves are for the most part long and tight, except those of evening wraps, which have huge novel sleeves with cuffs of fur.

The colors of the collection above mentioned include new and hitherto unimagined greens, blues and blue-greens verging on peacock. There is some rose and a new light red very like pomegranate. Pale maize is a new note for evening. For sports wear, there are new neutral-toned ensembles, the sweater blouses blocked in a cubist pattern looking like solid wool embroidery in three tones, the top coats fur-collared.

All shades of gray are in evidence and frequently several combine in one dress or ensemble, and gray also combines with black. There is much black, both for afternoon and evening, with touches of diamond embroidery or a single jewel.

Afternoon ensembles often consist of a velvet coat cut on straight lines and collared with lynx or fox and a satin or crepe dress in a lighter shade of the same color.

Many houses feature drapery, usually on the side in a puff or choux at the hip line, as in the frocks of Cyber. Nearly every house shows more flare in skirts, achieved by panels, godets, circular sections, fan-plaiting and tiers.

The uneven hemline is also fairly prevalent. Another shows models with circular flares much larger on one side than on the other. Still another favors the higher waist, approaching the normal.

Fall and Winter Coat, Kashmir Cloth in Gray

Showing a charming fall and winter coat of kashmir cloth in gray, with shawl collar and cuffs of gray dyed kid fox fur.

Neutral Colors Favored for Golfing in Paris

Love of golf does not exceed love of clothes with French women.

This season French women golfers make neutral colors the basis of their costumes. A visit to St. Cloud, St. Germain or any fashionable course near Paris shows a preponderance of beige and gray. An occasional bright sweater lights up the links, but hats, stockings and skirts are in neutral shades as a rule.

WONDERFUL INVENTION WILL BE EXHIBITED

At the Radio World's Fair in
Madison Square Garden
New York City.

Devices so delicate and yet so powerful in their potentialities as to stagger the imagination are to be actually operated, for the first time in public, at the Radio World's Fair, in Madison Square Garden, New York City, Sept. 19 to 24, inclusive.

A demonstration of a fire alarm device that literally "sees" and responds to the faintest trace of smoke is a part of the display to be exhibited by the Westinghouse Electric and Manufacturing Company in the theatre of wonders at the Radio World's Fair.

The agency that operates the alarm is a combination of a photo-electric cell and what is practically a standard radio tube—an achievement of Dr. V. K. Zworykin, physicist on the research staff of the Westinghouse Company. The tube is so responsive to light changes that smoke, as faint as a whiff from a cigarette, will be utilized to turn on a red light. When the smoke is conducted between an automobile headlight and the Zworykin device, the consequent diminution of light will lower the electrical current, and this reduction in the activity of the electrons will start a relay that will switch on the red light.

The Zworykin tube is the first invention to make possible the practical application of photo-electric effects. The principle had been a scientific curiosity until the Westinghouse scientists, after nearly two years of work, in the East Pittsburgh laboratories of the company, achieved his goal—the conversion of light rays into mechanical power.

In addition to acting as a fire detector, the device has a number of other practical applications. One of these is the automatic control of light houses in untended stretches of the sea.

With the Zworykin device, such lights may be turned on and off simply by the agencies of light and shadow.

SAGE SAYINGS

Great labor is wasted unless wisely applied.

Mother tongues frequently run to baby talk.

You can't do the right thing the wrong way.

A good laugh is sunshine in a house.—Thackeray.

Investments, like charity, should begin at home.

Inefficiency is the soil that does not grow success.

Scold a majority and the majority generally laughs.

A baby understands a great deal more than you think.

The longest life doesn't amount to much compared to time.

A man who loves lots of company goes to all the conventions.

Civilization is also the ability to escape the plagues of civilization.

Love thy neighbor as thyself—but know thy neighbor as thou dost thyself.

All men may be made of dust, but some men have a lot more dust than others.

Pity the mortal who has ceased to chase at least one rainbow.—Forbes Magazine.

It sometimes happens that a girl may get rid of a persistent suitor by marrying him.

Millions of people can't be impressed with the idea that they ought to "improve their souls."

A woman likes to have people say that she is young looking and is a member of an old family.

Longer a man lives, the more he is convinced that truth lies deeper than at the bottom of a well.

First Envelopes

Envelopes came into use in the United States and in England between 1840 and 1850. The first practical machine for making envelopes was patented in England in 1844 and the first American patent was taken out in 1849.

Maytag dealers everywhere follow the standardised rule of sending a Maytag to a home to do a week's washing free, and without obligation of any kind. This is the way all Maytag Gyrafoam Washers are sold.

"Words of Christ"

The word "Agrapha," a name used to describe the documents reporting the perpetuated sayings of Christ, was first used in this connection in 1776 by J. P. Korner. The technical meaning of the word as the title of this book was accepted in literary parlance in 1880. At present the word means "writings giving citations of the actual words of Christ."

TO HOLDERS OF
SECOND LIBERTY LOAN
4 1/2 PER CENT BONDS

**EXCHANGE OFFERING OF NEW
TREASURY NOTES**

Second Liberty Loan bonds have been called for payment on November 15th next, and no interest will be paid after that date.

Notice is given of a new offering of United States Treasury notes, in exchange for Second Liberty Loan Bonds. The new notes will be dated September 15, 1927, and will bear interest from that date at the rate of 3 1/2 per cent. The notes will mature in five years but may be called for redemption after three years.

Interest on Second Liberty Loan Bonds converted 4 1/2 per cent bonds surrendered and accepted in exchange will be paid to November 15, 1927. The price of the new issue of notes is 100 1/2. Holders surrendering Second Liberty Loan Bonds converted 4 1/2 per cent bonds in exchange will receive, at the time of delivery of the new notes, interest on such Second Liberty Loan Bonds converted 4 1/2 per cent bonds from May 15, 1927, to November 15, 1927, less the premium on the new notes issued.

Holder of Second Liberty Loan Bonds converted 4 1/2 per cent bonds who desire to take advantage of this opportunity to obtain Treasury notes of the new issue, should arrange with their bank for such exchange at the earliest possible date, as this offer will remain open only for a limited period after September 15th.

Further information may be obtained from banks or trust companies, or from any Federal Reserve Bank.

A. W. MELLON,
Secretary of the Treasury.
Washington, D. C., September 6, 1927.

Relieved His Feelings

"Had a good lecture on Alaska, didn't we, Zeb?" asked one of Mr. Gorton's neighbors, meeting him the next morning. "To sit there by the radio peaceful as pie for two hours hearing him reel off the information was a grand rest for me, beat out with cranberrying as I be."

"It was a good enough talk," admitted Mr. Gorton, grudgingly, "but it didn't rest me any to speak of. Having to sit stock still without a chance to get in a word for two mortal hours. I was pretty well worn out afterward. But I took the lantern out in the woodshed and by the time I'd split up a week's kindling I felt kind of rested and calmed down."—Kansas City Star.

GERMANY'S VIEW

**Stresemann Says Peace Cannot
Come Unless Troops Are
Withdrawn.**

Geneva, Sept. 9.—(UP).—Foreign Minister Stresemann of Germany addressing the League of Nations assembly today said it would be impossible for the spirit of peace to have its full course so long as German territory was occupied by foreign troops.

The foreign minister announced that Germany would sign the optional clause in the Hague Court Protocol accepting the obligatory jurisdiction of the court in international disputes.

Emphasizing the modern importance of economic and material relations, Stresemann expressed the opinion that the next war would be an economic war.

**POOR OF NEW YORK
IN EVIL CONDITION**

With the general increase of luxurious apartment houses for the wealthy the New York city health department is endeavoring to bring before the public the fact that housing conditions in certain parts of the lower and extreme upper East side have not kept pace with the sanitary progress of the rest of the city. The infant mortality and general mortality rates and the tuberculosis rate of these parts is considerably higher than the rates for the city as a whole. Field nurses from the department have recently completed a house-to-house survey of these districts. The conditions disclosed Louis I. Harris, health commissioner, describes as menacing and intolerable. Bedrooms are crowded and badly ventilated. Many families live in basements. Scattered throughout the sections are factory buildings which the commissioner regards as having a definite influence upon the health of the children. Doctor Harris hopes to arouse the city to the need of remedial measures.

Early Biblical Division

The first division of the Bible into verses was made by Stephens, the printer, in 1551.

THE BUCKEYE PROVIDES UNQUESTIONABLE**Security for Money Entrusted to Its Care**

**The Buckeye State
Building and Loan**
22 WEST GAY ST. COLUMBUS, O. ESTABLISHED 1895

AUBURN**Breaks Closed-Car 2,000-mile Record**

Then during night skidded in rain storm, turned over several times, received body repairs only

Then Finishes 15,000-miles at 62.709 M.P.H.

For more than 30 hours, averaging better than 65 miles an hour, this strictly stock Auburn Sedan had been whirling around the Atlantic City Speedway day and night.

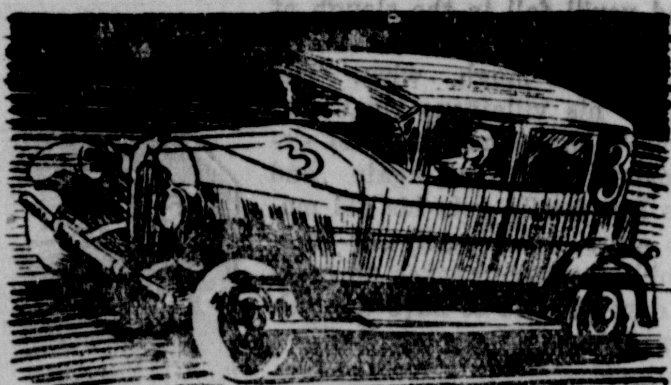

Then came a terrific rain storm. Wet track. At 70 miles per hour the driver skidded, the car crashed.

Radiator and body repairs were made. Seven hours had been lost. But the Sedan went back into the test with the same driver. It caught up with the other two Auburn stock cars and finished the unprecedented distance of 15,000 miles.

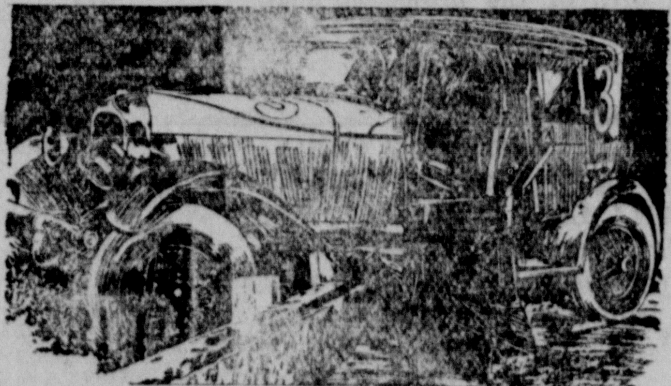

After the accident, the car was declared non-stock, as it was no longer complete—exactly as sold, but its time continued to be officially recorded by the A.A.A. The longest, hardest and fastest official test ever given a closed car.

Unheard of as this performance is, it was only an incident in the 42,000 miles of official stock car test Auburn conducted, breaking all records for completely equipped stock cars from 5 to 5,000 miles, and establishing new stock car records from 5,000 to 15,000 miles.

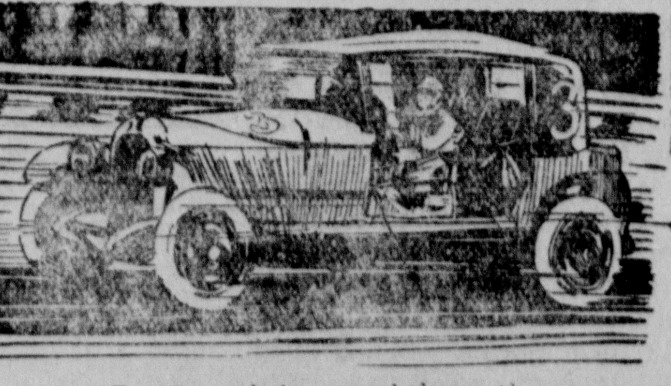

The purpose of this extreme and hitherto unattempted stock car test, was to demonstrate by three times greater proof the supreme leadership of Auburn cars in speed, endurance, durability and efficiency. Your Auburn dealer has exact duplicates of the Auburn cars that made these phenomenal records.

Drawing made from actual photograph
The Auburn Straight Eight Sedan, one of the three fully equipped stock cars in the Atlantic City Speedway endurance test. Here it is shown traveling better than 70 miles an hour after breaking closed-car 2,000 mile record at 65.583 miles per hour.

Drawing made from actual photograph
About the middle of the second night of this continuous run, when the track was wet as a result of a rain storm, the driver skidded. As a result, the car going at high speed skidded. It hit the guard rail and turned over. The sturdy construction of Auburn resisted this smash so well that only body damages resulted. The driver was unhurt.

Drawing made from actual photograph
Here is proof of stamina! After 7 hours for photographs and body repairs, this sedan went skidding into the endurance test, driven by the same driver, and finished the remainder of the 15,000 miles at an average speed of over 67 miles an hour for the net running time for the entire distance.

6-66 Roadster \$1095; 6-66 Sport Sedan \$1195; 6-66 Sedan \$1295; 8-77 Roadster \$1395;

Enjoy Your Home

--- All of It ---

This winter many families will LIVE ALL OVER THEIR HOMES—using all the rooms, enjoying the comforts of ALL of their furniture, for they will use the modern Cabinet Heaters.

Others will live in one or two rooms, close up the balance of the house for the winter, all on account of the inefficiency of the old type of heating stove. They will hover around the old stove in an effort to keep warm, while the other folks will be enjoying themselves all over their homes, for the reason that they are using one of our circulating Heaters.

There is no "guess-work" any more about these new heaters doing the work for which they are intended. We have sold them for the past five years AND THEY DO WORK. Ask any of our users—we'll be glad to tell you who they are and where they live.

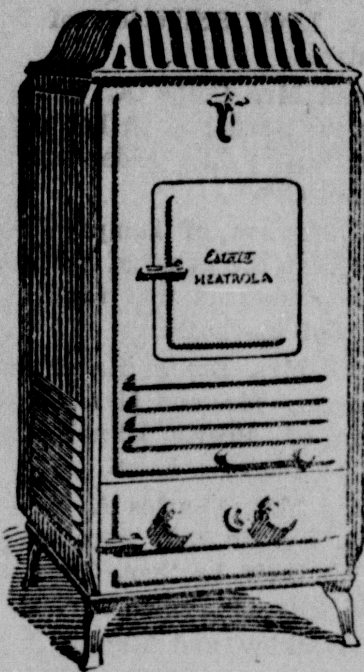

CIRCULATORS

For All Sizes of Pockets—Books—Here They Are

First comes the Old Reliable

**Estate
HEATROLA**

There is only ONE Heatrola—ESTATE builds it

This Heater has been used longer than any other Circulating Heater. We believe it to be the best built and most efficient heater on the market. The Intensi-Fire Air Duct, placed inside of the combustion chamber, doubles the amount of hot air discharged. We have them heating up to eight rooms.

Price \$154.50 (cash)

Then there's the

SOLAR PARLOR FURNACE

The outer casing is Porcelain Enameld, with Grained Mahogany finish. It is one of the largest and most powerful heaters on the market. The manufacturer had the farmer in mind when he built this heater. It has an 18 inch fire-pot, with boiler plate body. It has heating capacity of 12,000 cubic feet, or enough to easily heat six to eight large rooms. It is 54 inches high, and 24 inches square. A beautiful piece of furniture as well as a very efficient heater.

Price is only \$125.00

Next in Line Comes

Keeps All YOUR Home Warm**—THE RADIO—**

It has a heating capacity of 8,000 cubic feet, or enough to heat five to six rooms comfortably. It has a 16 inch fire-pot, and stands 50 inches high, and 22 inches wide. Finished in a beautiful Mahogany finish. This heater sells at **\$90.00**

The Radio, same as above, with the exception that the finish is plain black, with nickled corner pieces, sells at the extremely low price of only \$64.50. Why buy the old fashioned type of round heater when you can buy a parlor furnace for so little?

A Real Heater for the Money is
THE CABINET

This type is built like a smelting furnace,—with a lining of fire-clay. They have been used under the most trying conditions, heating warehouses, and the results were most satisfactory. We have them in two sizes—16 inch pots with a capacity of 8,000 cubic feet, and 18 inch pots with a capacity of 10,000 cubic feet.—PRICES—

16 inch plain black finish \$50.00
16 inch Mahogany finish \$75.00
18 inch plain black finish \$65.00
18 inch Mahogany finish \$85.00

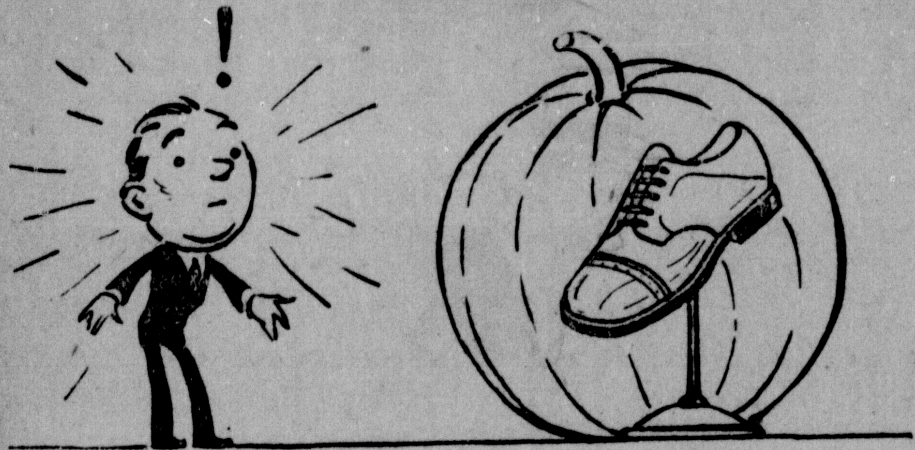

Yes, we still have some Round Heaters Used and New—Florence used—Moore's Air-Tight used—Round Oak used and new—and others. All of them at a price that will interest you. If you are needing a heating stove, it will pay you to visit our Stove Department.

"No. I'm going to marry an old-fashioned girl."

Good Substitute

Williamstown, Mass.—Football has been substituted for head hunting among some Filipino tribes, who report the gridiron pastime "almost as satisfying," says C. C. Batchelder, ex-secretary of the interior.

For the Overpractical

A wild flower is one of life's extras; one of those things we do not have to have but which we enjoy all the more for that reason.—American Magazine.

Genuine Refiners' Ethyl Gas can only be obtained from The Circleville Oil Co. Don't use a substitute. 20aug&wtf.

Chinese Invented Coins

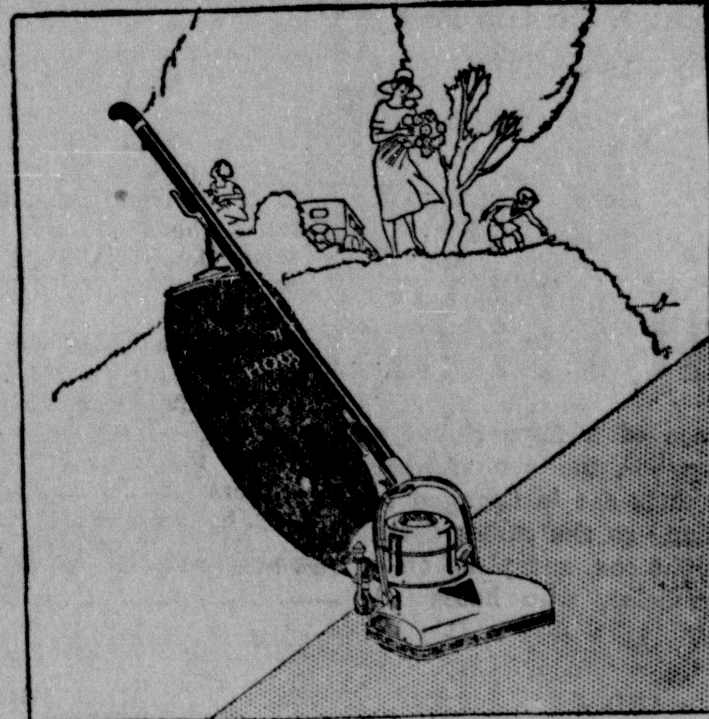

Hard money or coins were invented by China in 1000 B. C., by Greece in 700 B. C. and by India in 500 B. C.

Kangaroo Outstrips Horse

In a recent race between an Australian race horse and a kangaroo, the latter far outdistanced the horse.

The HOOVER

It BEATS... as it Sweeps as it Cleans

Positive Agitation means a lifelong vacation from drudgery

DIRT never takes a vacation. Day-long, month-long it sifts and filters into the home, to find a favorite hiding place in carpets and rugs.

That means drudgery for the homekeeper, a never-ending and never-won struggle.

But now the homekeeper has a new friend and ally in her fight against dirt, one offering her a life-long vacation from the drudgery of cleaning by old methods.

This new friend and ally is

The Hoover and "Positive Agitation"—enabling faster, easier, deeper cleaning of floor coverings than ever before.

You can enjoy its benefits now not only in the world-famous Model 700 Hoover but in a lower-priced Model 543 Hoover as well.

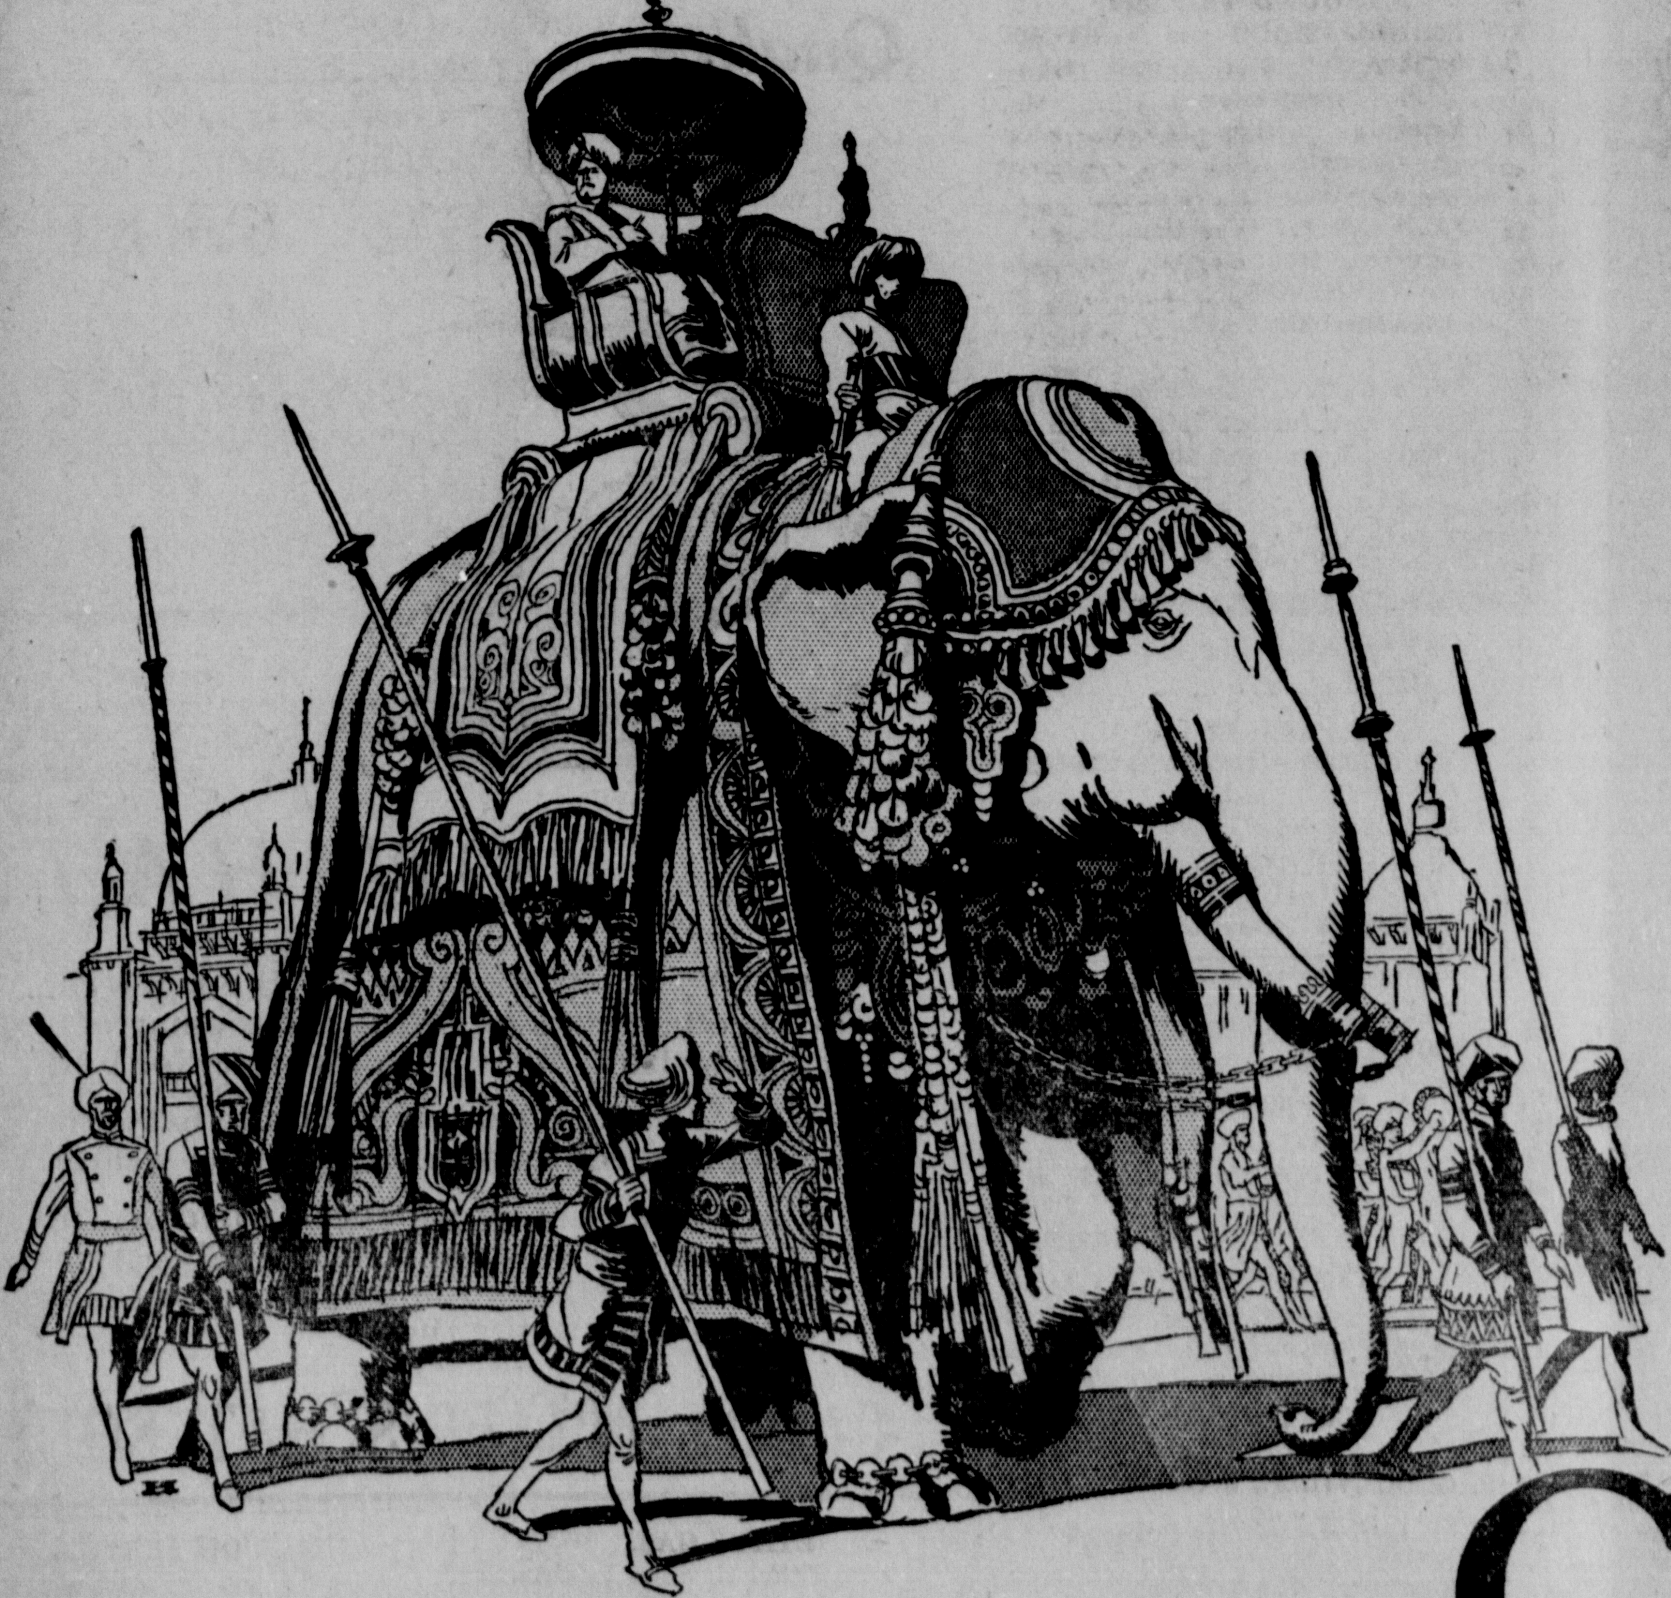

Dusting Tools, \$12.50
The Model 700 Hoover, \$75
The Model 543 Hoover ..

\$59.50
Easy payments if desired. Only \$6.25 down. We will give you a liberal allowance for your old cleaner. Phone us today for a free home demonstration.

CIRCLEVILLE, OHIO.

THE SUN NEVER SETS ON CHESTERFIELD'S POPULARITY

[Popular in all 4 corners
of the Earth...]

in **Bombay...**

and all along "the road to Mandalay"

IN THE newspapers of Bombay, Calcutta and Rangoon Chesterfield advertising speaks of "wrapper-packets" and prices are in rupees... but you may be sure it's the same Chesterfield that you buy in every corner of the U. S. A.

Chesterfield's success in far-off India is typical of its world-wide popularity. Smokers of every race and creed appreciate the natural tobacco taste and fragrance of this famous blend.

Chesterfield

—such popularity
must be deserved!
